**The Storytelling Animal** Jonathan Gottschall, 2012-04-10 Insightful draws from disparate corners of history and science to celebrate our compulsion to storify everything around us The New York Times Book Review Humans live in landscapes of make believe We spin fantasies We devour novels films and plays Even sporting events and criminal trials unfold as narratives Yet the world of story has remained an undiscovered and unmapped country It's easy to say that humans are wired for story but why In this delightful original book Jonathan Gottschall offers the first unified theory of storytelling He argues that stories help us navigate life's complex social problems just as flight simulators prepare pilots for difficult situations Storytelling has evolved like other behaviors to ensure our survival Drawing on the latest research in neuroscience psychology and evolutionary biology Gottschall tells us what it means to be a storytelling animal Did you know that the more absorbed you are in a story the more it changes your behavior That all children act out the same kinds of stories whether they grow up in a slum or a suburb That people who read more fiction are more empathetic Of course our story instinct has a darker side It makes us vulnerable to conspiracy theories advertisements and narratives about ourselves that are more truthy than true National myths can also be terribly dangerous Hitler's ambitions were partly fueled by a story But as Gottschall shows stories can also powerfully

change the world for the better We know we are master shapers of story The Storytelling Animal finally reveals how stories shape us Lively San Francisco Chronicle Absorbing Minneapolis Star Tribune One of my favorite evolutionary psych writers always insightful and witty Steven Pinker
