Christianity In Human Evolution:

Christianity in Evolution Jack Mahoney, 2011-08-01 Evolution has provided a new understanding of reality with revolutionary consequences for Christianity In an evolutionary perspective the incarnation involved God entering the evolving human species to help it imitate the trinitarian altruism in whose image it was created and counter its tendency to self absorption Primarily however the evolutionary achievement of Jesus was to confront and overcome death in an act of cosmic significance ushering humanity into the culminating stage of its evolutionary destiny the full sharing of God s inner life Previously such doctrines as original sin the fall sacrifice and atonement stemmed from viewing death as the penalty for sin and are shown not only to have serious difficulties in themselves but also to emerge from a Jewish culture preoccupied with sin and sacrifice that could not otherwise account for death The death of Jesus on the cross is now seen as saving humanity not from sin but from individual extinction and meaninglessness Death is now seen as a normal process that affect all living things and the religious doctrines connected with explaining it in humans are no longer required or justified Similar evolutionary implications are explored affecting other subjects of Christian belief including the Church the Eucharist priesthood and moral behavior

When Did Sin Begin? Loren Haarsma, 2021-08-17 The question of the historical Adam is a flashpoint for many evangelical readers and churches Science and theology scholar Loren Haarsma who has studied written and spoken on science and faith for decades shows it is possible both to affirm what science tells us about human evolution and to maintain belief in the doctrine of original sin Haarsma argues that there are several possible ways of harmonizing evolution and original sin taking seriously both Scripture and science He presents a range of approaches without privileging one over the others examining the strengths and challenges of each

Christianity in Human Evolution Rudolf Steiner, 1979 *Human Evolution and Christian Ethics* Stephen J. Pope, 2007-12-20 Can the origins of morality be explained entirely in evolutionary terms If so what are the implications for Christian moral theology and ethics Is the latter redundant as socio biologists often assert Stephen Pope argues that theologians need to engage with evolutionary theory rather than ignoring it He shows that our growing knowledge of human evolution is compatible with Christian faith and morality provided that the former is not interpreted reductionistically and the latter is not understood in fundamentalist ways Christian ethics ought to incorporate evolutionary approaches to human nature to the extent that they provide helpful knowledge of the conditions of human flourishing both collective and individual From this perspective a strong affirmation of human dignity and appreciation for the theological virtues of faith hope and charity is consistent with a revised account of natural law and the cardinal virtues

Evolution and the Fall William T. Cavanaugh, James K. A. Smith, 2017-02-19 What does it mean for the Christian doctrine of the Fall if there was no historical Adam If humanity emerged from nonhuman primates as genetic biological and archaeological evidence seems to suggest then what are the implications for a Christian understanding of human origins including the origin of sin Evolution and the Fall gathers a multidisciplinary ecumenical

team of scholars to address these difficult questions and others like them from the perspectives of biology theology history Scripture philosophy and politics CONTRIBUTORS William T Cavanaugh Celia Deane Drummond Darrel R Falk Joel B Green Michael Gulker Peter Harrison J Richard Middleton Aaron Riches James K A Smith Brent Waters Norman Wirzba

Debunking Human Evolution Taught in Our Public Schools Daniel A. Biddle,David A. Bisbee,Jerry Bergman,2016-06-13 Most biology classes in today s public schools teach evolutionary theory as fact and only rarely mention creation possibilities outside of this theory This book is essential for Christians attending public high school or college especially before they take biology or other science classes This book is written by leading Christian scientists and will help Christian high school and college students solidify their faith and grow roots to withstand evolution based teaching Topics included ape and human differences a history of human evolution in textbooks typical ape to human progressions taught in textbooks different races of people DNA similarity genetics and a recent creation over design in biology vestigial structures and biblical authority

The Evolution of Adam Peter Enns,2021-10-19 Can Christianity and evolution coexist Traditional Christian teaching presents Jesus as reversing the effects of the fall of Adam But an evolutionary view of human origins doesn t allow for a literal Adam making evolution seemingly incompatible with what Genesis and the apostle Paul say about him For Christians who both accept evolution and want to take the Bible seriously this can present a faith shaking tension Popular Old Testament scholar Peter Enns offers a way forward by explaining how this tension is caused not by the discoveries of science but by false expectations about the biblical texts In this 10th anniversary edition Enns updates readers on developments in the historical Adam debate helping them reconcile Genesis and Paul with current views on evolution and human origins This edition includes an afterword that explains Enns s own theological evolution since the first edition released

I Love Jesus & I Accept Evolution Denis O. Lamoureux,2009-03-04 In this thought provoking book born again Christian Denis O Lamoureux argues that the God of the Bible created the universe and life through evolution an ordained sustained and design reflecting natural process In other words evolution is not the result of blind chance and our creation is not a mistake Lamoureux challenges the popular assumption that God disclosed scientific facts in the opening chapters of Scripture thousands of years before their discovery by modern science He contends that in the same way the Lord meets us wherever we happen to be in our lives the

Holy Spirit came down to the level of the inspired biblical writers and used their ancient understanding of origins in order to reveal inerrant life changing Messages of Faith Lamoureux also shares his personal story and struggle in coming to terms with evolution and Christianity [Christianity and Evolution](#) Pierre Teilhard de Chardin,2002-11-18 The author of *The Phenomenon of Man* reconciles passionate faith with the rigor of scientific thinking With his unique background as a geologist paleontologist and Jesuit priest Pierre Teilhard de Chardin was a powerful exponent of the view that scientific theories could comfortably coexist with religious faith To this day his ideas provoke passionate debates in communities that view science and faith as necessarily separate ideologies In this collection of nineteen essays Teilhard seeks to illuminate a middle ground between science and religion that he felt both disciplines could accept He explores the Fall and original sin the possibility of life on other planets and the role that God may have played in the process of human evolution successfully challenging contemporary theologians to rethink their views of the universe and its creation Like other great visionary poets Blake Hopkins Yeats Teilhard engages the reader both intellectually and sensually *The Washington Post Book World* An excellent blend of theological speculation with practical or ascetical application *Catholic Telegraph* [Oxford Handbook of Cultural Evolution](#) Jamshid Tehrani,Rachel L.
