symptoms of illness Reiki has been around for thousands of years Its current form was first developed in 1922 by a Japanese Buddhist called Mikao Usui who reportedly taught 2 000 people the Reiki method during his lifetime The practice spread to the U S through Hawaii in the 1940s and then to Europe in the 1980s It is commonly referred to as palm healing or hands on healing What happens in a Reiki session Reiki is best held in a peaceful setting but it can be carried out anywhere The patient will sit in a comfortable chair or lie on a table fully clothed There may or may not be music depending on the patient s preference The practitioner places their hands lightly on or over specific areas of the head limbs and torso using different hand shapes for between 2 and 5 minutes The hands can be placed over 20 different areas of the body If there is a particular injury such as a burn the hands may be held just above the wound While the practitioner holds their hands lightly on or over the body the transfer of energy takes place During this time the practitioner s hands may be warm and tingling Each hand position is held until the practitioner senses that the energy has stopped flowing When the practitioner feels that the heat or energy in their hands has abated they will remove their hands and may place them over a different area of the body Some Reiki techniques The techniques involved have names such as centering clearing beaming extracting harmful energies infusing smoothing and raking the aura Some Reiki practitioners will use crystals and chakra healing wands because they find these can enable healing or protect a home from negative energy
