Behavioral Development Klaus Immelmann, George W. Barlow, Lewis Petrinovich, Mary Biggar Main, 1981-11-30

Developmental Psychobiology and Behavioral Ecology Elliott M. Blass, 2012-12-06 The previous volume in this series Blass 1986 focused on the interface between developmental psychobiology and developmental neurobiology The volume emphasized that an understanding of central nervous system development and function can be obtained only with reference to the behaviors that it manages and it emphasized how those behaviors in turn shape central development The present volume explores another natural interface of developmental psychobiology behavioral ecology It documents the progress made by developmental psychobiologists since the mid 1970s in identifying capacities of learning and conditioning in birds and mammals during the very moments following birth indeed during the antenatal period These breakthroughs in a field that had previously lain dormant reflect the need to meet the infant where it is in order for behavior to emerge Accordingly studies have been conducted at nest temperature infants have been rewarded by opportunities to huddle suckle or obtain milk behaviors that are normally engaged in the nest In addition there was rejection of the excessive deprivation extreme handling and traumatic manipulation studies of the 1950s and 1960s that yielded information on how animals could respond to trauma but did not reveal mechanisms of normal development In their place has arisen a series of analyses of how naturally occurring stimuli and situations gain control over behavior and how specifiable experiences impose limitations on subsequent development Constraints were identified on the range of interactions that remained available to developing animals as a result of particular events

Brain Plasticity, Learning, and Memory B. E. Will, 2013-03-13 This book is the result of the contributions presented at a conference held from August 30 to September 1 1984 at the Universite Louis Pasteur Strasbourg France This meeting was organized under the joint auspices of the European Brain and Behaviour Society EBBS and the Societe Fran aise pour l'Etude du Comportement Animal SFECA The objective of this meeting was to bring together an international group of participants to evaluate and to report on recent research in three broad and overlapping fields within the general theme of the relationships between brain plasticity and learning and memory These three fields are developmental plasticity adaptive plasticity and restorative plasticity Although the boundaries between these fields are a matter of debate see Introduction they have been retained as the major sections of this volume the arrangement of which roughly parallels that of the meeting We believe and very much hope that the contents of this volume convey an internal consistency despite the diversity of the material presented

Biology of Behaviour Donald M. Broom, 1981-10-30 This book is an introduction to studies of the behaviour of a wide variety of animals including man farm animals and pest species

Altruism and Aggression Carolyn Zahn-Waxler, E. Mark Cummings, Ronald J. Iannotti, 1991-07-26 Based on a conference held at the National Institute of Mental Health Bethesda Md in April 1982 under the auspices of the Society for Research in Child Development and the Child Development Foundation

Dog Behaviour,

Evolution, and Cognition Adam Miklosi, 2014-12-11 This is the first book to collate and synthesize the recent burgeoning primary research literature on dog behaviour evolution and cognition The author presents a new ecological approach to the understanding of dog behaviour demonstrating how dogs can be the subject of rigorous and productive scientific study without the need to confine them to a laboratory environment This second fully updated edition of *Dog Behaviour Evolution and Cognition* starts with an overview of the conceptual and methodological issues associated with the study of the dog followed by a brief description of their role in human society An evolutionary perspective is then introduced with a summary of current research into the process of domestication The central part of the book is devoted to issues relating to the cognitive aspects of behaviour which have received particular attention in recent years from both psychologists and ethologists The book's final chapters introduce the reader to many novel approaches to dog behaviour set in the context of behavioural development and genetics This second edition recognises and discusses the fact that dogs are increasingly being used as model organisms for studying aspects of human biology such as genetic diseases and ageing Specific attention is also given in this edition to attachment behaviour which emerges between humans and dogs the importance of inter specific communication in the success of dogs in human communities and the broad aspects of social cognition and how this may contribute to human dog cooperation Directions for future research are highlighted throughout the text which also incorporates links to human and primate research by drawing on homologies and analogies in both evolution and behaviour The book will therefore be of relevance and use to anyone with an interest in behavioural ecology including graduate students of animal behaviour and cognition as well as a more general audience of dog enthusiasts biologists psychologists veterinarians and sociologists
