## **Behavior Therapy Casebook:**

Theme and Variations Joseph Wolpe, 1976      A Casebook in Group Therapy Sheldon D. Rose, 1980      Child Behavior Therapy Casebook Michel Hersen, Cynthia G. Last, 2012-12-06

Some years ago we edited a general casebook on behavior therapy that was well received. However, those professors who used the book as an adjunct text in child behavior therapy courses were concerned that only 9 of the 26 chapters dealt with the clinical application of behavioral principles to children. Their contention was that a specific casebook on the topic was very much warranted. In considering their comments, we took a closer look at the child behavior therapy area and were struck with how diverse it was, how it had expanded, and how it had matured over the last three decades. Given this apparent gap in the literature, we decided to devote an entire casebook to both the standard and the more innovative clinical applications to the behavioral problems presented by children. The resulting book, containing 28 chapters, is divided into two parts. In the first part, in a chapter entitled "How the Field Has Moved On," we briefly trace the historical roots of child behavior therapy, detail the relationship of psychiatric diagnosis and behavioral assessment, and consider the importance of developmental norms, psychological testing efforts at prevention, and behavioral medicine. The bulk of this book, of course, appears in the 27 cases presented by our respective experts. Each of the treatment cases is presented in identical format for purposes of clarity, consistency, and comparability.

**Behavior Therapy Casebook** Michel Hersen, Cynthia G. Last, 1985      Adult Behavior Therapy Casebook Michel Hersen, Cynthia G. Last, 2013-11-11

Several years ago we edited a casebook on behavior therapy with children. The book appeared to fill a gap in the existing child literature and was quite well received. A similar gap appears to exist in the behavioral literature for adult cases in that there are very few adult case books currently available. The present book was developed in order to devote an entire casebook to both standard and more innovative clinical applications of behavioral treatments to adult problems. The book, containing 19 chapters, is divided into two parts. In the first part, in a chapter entitled "Clinical Considerations," we discuss a variety of clinical issues that are of importance to designing and executing behaviorally based interventions with adults. The bulk of the book, the remaining 18 chapters, contains a variety of cases presented by our experts. Each of the treatment cases is presented using the same format in order to increase consistency and comparability across chapters. Specific sections for each chapter are as follows: 1. Description of the Disorder, 2. Case Identification, 3. Presenting Complaints, 4. History, 5. Assessment, 6. Selection of Treatment, 7. Course of Treatment, 8. Termination, 9. Follow up, and 10. Overall Evaluation. Thanks are extended to our many expert contributors without whom this book would not be possible. We also wish to acknowledge the technical support of Mrs. Kim Sterner. Finally, we thank our editor at Plenum, Eliot Werner, for his support and forbearance in the face of the inevitable delays.

Comprehensive Casebook of Cognitive Therapy Frank M. Dattilio, 2013-06-29

This is the golden age of cognitive therapy. Its popularity among society and the professional community is growing by leaps and bounds. What is it and what are its

limits What is the fundamental nature of cognitive therapy It is to my way of thinking simple but profound To understand it it is useful to think back to the history of behavior therapy to the basic development made by Joseph Wolpe In the 1950s Wolpe astounded the therapeutic world and infuriated his colleagues by finding a simple cure for phobias The psychoanalytic establishment held that phobias irrational and intense fear of certain objects such as cats were just surface manifestations of deeper underlying disorders The psychoanalysts said their source was the buried fear in male children of castration by the father in retaliation for the son's lust for his mother For females this fear is directed toward the opposite sex parent The biomedical theorists on the other hand claimed that some as yet undiscovered disorder in brain chemistry must be the underlying problem Both groups insisted that to treat only the patient's fear of cats would do no more good than it would to put rouge over measles Wolpe however reasoned that irrational fear of something isn't just a symptom of a phobia it is the whole phobia
