Software Architecture Carlos E. Cuesta, David Garlan, Jennifer Pérez, 2018-09-19 This book constitutes the refereed proceedings of the 12th European Conference on Software Architecture ECSA 2018 held in Madrid Spain in September 2018. The 17 full papers presented together with 7 short papers were carefully reviewed and selected from 96 submissions. They are organized in topical sections as follows: Self Adaptive Architectures, IoT Architectures, Embedded and Cyber Physical Systems, Microservices Architectures, Service Oriented Architectures, Architectural Design Decisions, Software Architecture in Practice. *Sanctioned Savagery* Michael Oriard, 2025-09-09 American football was a violent sport from its beginning as a college game in the 1870s and 1880s in part because learning how to deal with the pain and violence to take it made men out of college boys. Michael Oriard, former NFL linebacker and professor emeritus of English, shows us that this fundamental belief persisted for more than a century until signs of chronic traumatic encephalopathy (CTE) were found in Pittsburgh Steelers center Mike Webster's brain. Suddenly the cost of taking it could mean long term damage not just to the body but also to the brain. Without anyone knowing it that risk had soared since the 1950s and 1960s when the hardshell plastic helmet became the primary weapon for blocking and tackling as taught by a new generation of college coaches led by the University of Alabama's Bear Bryant. In this cultural history of football at nearly all levels—high school, college, and pro—Oriard traces the perennial tension between health and culture regarding football as reflected in what the public read in newspapers, magazines, and online. Through examining how we once felt and how we now feel about the game, Oriard challenges us to grapple with the possibility that football might be too violent in an intolerable way. Teaching Computing Henry M. Walker, 2018-04-24 Teaching can be intimidating for beginning faculty. Some graduate schools and some computing faculty provide guidance and mentoring, but many do not. Often a new faculty member is assigned to teach a course with little guidance, input, or feedback. Teaching Computing: A Practitioner's Perspective addresses such challenges by providing a solid resource for both new and experienced computing faculty. The book serves as a practical, easy-to-use resource covering a wide range of topics in a collection of focused, down-to-earth chapters. Based on the author's extensive teaching experience and his teaching-oriented columns that span 20 years and informed by computing education research, the book provides numerous elements designed to connect with teaching practitioners, including a wide range of teaching topics and basic elements of teaching, including tips and techniques. Practical tone: the book serves as a down-to-earth practitioners' guide. Short, focused chapters. Coherent and convenient organization. Mix of general educational perspectives and computing-specific elements. Connections between teaching in general and teaching computing. Both historical and contemporary perspectives. This book presents practical approaches, tips, and techniques that provide a strong starting place for new computing faculty and perspectives for reflection by seasoned faculty wishing to freshen their own teaching. **Ag in the Classroom Notes**, 1988 Directed Self-placement Daniel Royer, Roger Gilles, 2003 This guide offers updated shopping tips
