The notion of 'dangerous fieldwork' covers all the physical, psychological, emotional, ethical, cultural or personal deprivations and distresses suffered by investigator(s) or participant(s) in social/field research ranging from physical pain and damage via mental and health related harm to loss of prestige and threats to identity.

## **Dangerous Fieldwork:**

**Dangerous Fieldwork** Raymond M. Lee, 1995 In my view the monograph will be well worth the modest outlay involved for three kinds of user First for fieldworkers who choose to spurn safe topics it makes good preliminary reading alerting them to issues that they should address before entering the field and pointing them to additional follow up material Secondly for teachers of courses in research methodology it provides a useful supplementary text on a neglected field Finally for administrators of academic and research institutions it would be a valuable tool in any attempt to formulate or revise policies on health and safety issues related to fieldwork Peter D Abbs in Drug and Alcohol Review Fieldwork can be dangerous How can researchers gain access but mediate personal safety in the midst of violent social conflict Under what conditions does danger occur and what can a researcher do to evade it or manage it In *Dangerous Fieldwork* Lee examines the kinds of dangers researchers face and provides strategies for reducing risk in perilous situations He presents experiences of researchers who have worked among various groups such as outlaw bikers youth gangs and those infected with HIV He also discusses the hazards of working with informants in inherently dangerous occupations The underdocumented but increasingly important subject of sexual harassment and assault is addressed as well In this volume the author avoids adopting an alarmist stance toward potentially dangerous fieldwork Instead he emphasizes the importance of carefully appraising research settings for possible dangers *Dangerous Fieldwork* is invaluable reading for all researchers especially those interested in qualitative methods in the fields of anthropology sociology criminology nursing and health care drugs and alcohol and law *Dangerous Fieldwork* Adam David Scourfield Baird, 2020 **Dangerous Fieldwork** Raymond M.

*Women Fielding Danger* Martha Knisely Huggins, Marie-Louise Glebbeek, 2009 In a compelling exploration of an oft hidden aspect of qualitative field research *Women Fielding Danger* shows how identity performances can facilitate or block field research outcomes The book asks questions that are crucial for all women engaged in field research Do researchers enter their field site with a totally neutral identity Can a researcher's own identity be at odds with how interviewees see her Could a researcher be of the wrong gender sexuality nationality or religion for those being studied Must some of a researcher's identities be subsumed in certain research settings How much identity disguise is possible before a researcher violates research ethics or loses herself Together these questions inform the book's themes of the centrality of gender social and political danger the negotiation of identities and on site ethics Focusing on ethnographic research across a wide range of disciplines and world regions this deeply informed book presents practical to dos and technical research strategies In addition it offers unique illustrations of how the political geographic and organizational realities of field sites shape identity negotiations and research outcomes Understanding these dynamics the authors show is key to surviving the ethnographic field
