*Rubrics for Assessing Student Achievement in Science Grades K-12* Hays B. Lantz, 2004-02-06 I recommend *Rubrics for Assessing Student Achievement in Science Grades K-12* to any school district that is moving toward a standards based curriculum. It will serve as a valuable tool for assessing student learning. Grace Cisek, Director of Mathematics and Science Curriculum, Chester County Intermediate Unit, PA. At last, science educators will now be able to use custom made rubrics to assess and evaluate student performance in the standards based science classroom. Combining clarity, detail, utility, and practicality, veteran educator and author Hays B. Lantz Jr. offers the most complete collection of evaluation and assessment tools in science education available today. This concise handbook was designed to improve the quality and uniformity of evaluation as well as assessment of student progress. Written in language appropriate for both students and teachers in grades K-12, there are over 100 ready to use performance lists, holistic rubrics, and analytic rubrics that contain clear descriptions of the particular traits and qualities desired in student products and performances. Key features distinguishing this book include: Scoring tools for a wide range of products and performances found in effective science classrooms and programs; Assessment tools that differentiate by learning levels, providing a scaffolding of increasingly complex expectations across the grades; Years of extensive field testing of the evaluative criteria. *Rubrics for Assessing Student Achievement in Science Grades K-12* is a valuable resource that will help to measure what students know and are able to do in the science classroom. It will yield more consistent and defensible judgments, more precise feedback, and sharper student learning and performance. This text is the work of 16 contributors who each employ a single metaphor that will resonate with readers: that science education can and should be considered an exciting game. *With Windows Into the Classroom*, personal accounts, and *The Game in Action*, vignettes, students are provided with practical applications throughout the book. Many contributors to this book were involved in the development and draft review of the National Science Education Standards and therefore fully appreciate the importance of overtly linking research based commentary and recommendations to the Standards. As a result, the entire work is steeped in a current research foundation tied closely to the National Science Education Standards. Features of this new text: *Windows into the classroom*, personal accounts, and *The Game in Action*, vignettes, provide practical applications throughout the book. Written in accessible first person accounts, each contributor takes a conversational approach that will appeal to a broad audience of readers. *Introductions* establishes the
