Capitalizing Knowledge:

Capitalizing Knowledge Henry Etzkowitz, Andrew Webster, Peter Healey, 1998-09-24 Capitalizing Knowledge explores the academic industrial interface in a sustained and critical analysis drawing on expertise in a wide range of disciplines from the U S Latin America and Europe Using an international focus the book examines the range of experiences problems and solutions that different countries have had in managing academic industrial links Of key importance to policy makers in government academia and industry Capitalizing Knowledge explores the current trends as well as the commercialization of universities as they seek to capitalize their research The authors are part of an international research network that over the past five years has examined the capitalization of knowledge in academic industrial relations They provide an analysis of the institutional changes occurring today as well as an analysis of its implications Also explored is the role of the university in economic development the dynamics of technology transfer and country specific analyses of new links between industry and academia

The Capitalization of Knowledge Riccardo Viale, Henry Etzkowitz, 2010-01-01 This book is an authoritative confirmation of the critical role that knowledge plays in economic transformation It is an indispensable roadmap for new research programmes and a guidepost for policy makers around the world Calestous Juma Harvard Kennedy School US How to use and capitalize knowledge for the benefit of society has become even more urgent in the present financial and economic crisis This book embraces the tensions inherent in the complex governance of research and innovation It argues for strategies appropriate to the behaviour of complex adaptive systems in an evolutionary mode thereby highlighting in a timely manner the necessary fit between organizational forms and the epistemological structure of knowledge in the overall context of a fertile investment climate Helga Nowotny European Research Council WWTF Vienna Science and Technology Fund Austria In the 21st century economic and social development depends increasingly on knowledge rather than labour and capital This book examines how knowledge is exploited through the development of innovations that yield economic and other benefits The authors who include leading figures from the field of innovation studies look in particular at the growing links between universities government and industry and the evolving triple helix relationship as they attempt to develop more effective means for capitalizing on knowledge The book will be of considerable interest to policy makers and to senior managers in industry and universities as well as to innovation scholars Ben Martin University of Sussex UK In recent years university industry government interactions have come to the forefront as a method of promoting economic growth in increasingly knowledge based societies This ground breaking new volume evaluates the capacity of the triple helix model to represent the recent evolution of local and national systems of innovation It analyses both the success of the triple helix as a descriptive and empirical model within internationally competitive technology regions as well as its potential as a prescriptive hypothesis for regional or national systems that wish to expand their innovation processes and industrial development In addition it examines the legal economic administrative political and cognitive dimensions employed to

configure and study in practical terms the series of phenomena contained in the triple helix category This book will have widespread appeal amongst students and scholars of economics sociology and business administration who specialise in entrepreneurship and innovation Policy makers involved in innovation industrial development and education as well as private firms and institutional agencies will also find the volume of interest

Capitalizing on Knowledge David Skyrme,2012-06-14 Many organizations are embracing knowledge management as a source of strategic advantage But already people are asking what comes next Likewise almost every large organization is heavily involved in e commerce and turning their organizations into e businesses At the moment most e commerce is focused on selling traditional products and services through the new medium of the Internet However the more an organization evolves into an e business the more they can exploit knowledge flows between themselves and their marketplace This book draws together the two strands of knowledge and e business into the emerging field that this book has called k business A k business is one that turns an organization s knowledge assets into knowledge products and services and uses the Internet to market and deliver them online Despite its newness the Delphi Group have forecast that within 5 years person to person information e commerce a major aspect of k business will be a 5 billion business leveraging 50 billion in sales of other products and services

Capitalizing on Knowledge aims to give professionals and managers early insights into how to develop successful k businesses It takes a critical and balanced view of the building blocks of a k business including knowledge productizing e commerce enablers and Internet marketing It draws on lessons from successes and failures in the dot com landscape and of the early pioneers of knowledge markets The writing style engenders interest and readability supported by diagrams screen images check lists and frameworks There are points to ponder to stimulate thinking and decision making Five case studies and over 50 illustrative examples provide insights into the application of the book s concepts No other book brings all the elements of a k business together in one place to provide a thought provoking yet practical companion for those who want to capitalize on their knowledge
