Knuth for the breadth clarity accuracy and good humor found in his books To begin the fourth and later volumes of the set and to update parts of the existing three Knuth has created a series of small books called fascicles which will be published at regular intervals Each fascicle will encompass a section or more of wholly new or revised material Ultimately the content of these fascicles will be rolled up into the comprehensive final versions of each volume and the enormous undertaking that began in 1962 will be complete Volume 4 Fascicle 4 This latest fascicle covers the generation of all trees a basic topic that has surprisingly rich ties to the first three volumes of *The Art of Computer Programming* In thoroughly discussing this well known subject while providing 124 new exercises Knuth continues to build a firm foundation for programming To that same end this fascicle also covers the history of combinatorial generation Spanning many centuries across many parts of the world Knuth tells a fascinating story of interest and relevance to every artful programmer much of it never before told The story even includes a touch of suspense two problems that no one has yet been able to solve
