Art Revolutions:

Art and Revolution in Latin America, 1910-1990 David Craven, 2006-01-01 In this uniquely wide ranging book David Craven investigates the extraordinary impact of three Latin American revolutions on the visual arts and on cultural policy. The three great upheavals in Mexico 1910-40, in Cuba 1959-89 and in Nicaragua 1979-90 were defining moments in twentieth century life in the Americas. Craven discusses the structural logic of each movement's artistic project by whom, how and for whom artworks were produced and assesses their legacies. In each case he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders. The book not only examines specific artworks originating from each revolution's attempt to deal with the challenge of socializing the arts but also the engagement of the working classes in Mexico, Cuba and Nicaragua with a tradition of the fine arts made newly accessible through social transformation. Craven considers how each revolution dealt with the pressing problem of creating a dialogical art, one that reconfigures the existing artistic resource rather than one that just reproduces a populist art to keep things as they were. In addition, the author charts the impact on the revolutionary processes of theories of art and education articulated by such thinkers as John Dewey and Paulo Freire. The book provides a fascinating new view of the Latin American revolutionaries from artists to political leaders who defined art as a fundamental force for the transformation of society and who bequeathed new ways of thinking about the relations among art, ideology and class within a revolutionary process. *50 Art Movements*

You Should Know Rosalind Ormiston, 2018-09-18 The latest volume in this beautifully produced and affordable series introduces readers to the major developments in the history of modern art from Realism to the New Leipzig School. The story of modern art begins with a revolution when the realists started rejecting romanticism in favor of depicting life as it really was. Since that movement began in the mid-19th century, painters have been rebelling, rethinking, deconstructing and challenging notions of what art is. Filled with stunning reproductions of some of the world's greatest masterpieces, this reference book offers a chronological journey through artistic revolutions. Each movement is presented in a series of informative presentations: a concise definition and description, full page and smaller detailed color illustrations, and in depth profiles of the artists crucial to the style's development. Covering a wide range of movements, both familiar and obscure, this accessible and informative volume is a perfect introduction for readers interested in art's constantly evolving story.

Movement, Time, Technology, and Art Christina Chau, 2017-06-12 This book explores the ways in which artists use technology to create different perceptions of time in art in order to reflect on contemporary relationships to technology. By considering the links between technology, movement and contemporary art, the book explores the changing relationship between temporality in art, art history, media art, theory, modernity, contemporary art and digital art. This book challenges the dominant view that kinetic art is an antiquated artistic experiment and considers the changing perception of kinetic art by focusing on exhibitions and institutions that have recently challenged the notion of kinetic art as a marginalised and forgotten artistic

experiment with mechanical media This is achieved by deconstructing Frank Popper's argument that kinetic art is a precursor to subsequent explorations in the intersections between art, science, and technology Rather than pandering to the prevailing art historical assumption that kinetic sculpture is merely a precursor to art in a digital culture, the book proposes that perhaps kineticism succeeded too well where movement has become a ubiquitous element of the aesthetic of contemporary art If, as Boris Groys has recently suggested, installation has become the dominant mode of art in the contemporary age, then movement in real time with the viewer is used to aestheticise and explore the facets of our peculiar time

Total Modernity and the Avant-Garde in Twentieth-Century Chinese Art Minglu Gao, 2011-04-29 A groundbreaking book that describes a distinctively Chinese avant-gardism and a modernity that unifies art, politics, and social life To the extent that Chinese contemporary art has become a global phenomenon, it is largely through the groundbreaking exhibitions curated by Gao Minglu: China Avant-Garde Beijing 1989, Inside Out: New Chinese Art Asia Society New York 1998, and The Wall: Reshaping Contemporary Chinese Art Albright Knox Art Gallery 2005 among them As the first Chinese writer to articulate a distinctively Chinese avant-gardism and modernity, one not defined by Western chronology or formalism, Gao Minglu is largely responsible for the visibility of Chinese art in the global art scene today Contemporary Chinese artists tend to navigate between extremes, either embracing or rejecting a rich classical tradition Indeed, for Chinese artists, the term modernity refers not to a new epoch or aesthetic but to a new nation; modernity inextricably connects politics to art It is this notion of total modernity that forms the foundation of the Chinese avant-garde aesthetic, and of this book Gao examines the many ways Chinese artists engaged with this intrinsic total modernity, including the 85 Movement, political pop, cynical realism, apartment art, maximalism, and the museum age, encompassing the emergence of local art museums and organizations, as well as such major events as the Shanghai Biennial He describes the inner logic of the Chinese context while locating the art within the framework of a worldwide avant-garde He vividly describes the Chinese avant-garde's embrace of a modernity that unifies politics, aesthetics, and social life, blurring the boundaries between abstraction, conception, and representation Lavishly illustrated with color images throughout, this book will be a touchstone for all considerations of Chinese contemporary art

After Thomas Kuhn: The Structure of Aesthetic Revolutions Oana Șerban, 2022-11-07 This book reflects the most recent research devoted to a systematized perspective and a critical reconstruction of previous theoretical attempts of explaining, justifying, and continuing Kuhn's ingenious hypothesis in arts Hofstadter, Clignet, and Habermas revealed to be the most engaged scholars in solving this aesthetic puzzle In this context, the structural similarities between science and arts are attentively evaluated, thus satisfying an older concern attributed to the historical Kuhn-Kubler dispute extensively commented along the pages of this book How can we track the matter of rationality and truth in art and aesthetics inspired by scientific perspectives? Are artistic styles similar to scientific paradigms? Are we entitled to pursue paradigms and masterpieces as rational models in science, respectively in arts? On what possible grounds can we borrow from

science notions such as progress and predictability in the study of the evolution of art and its aesthetic backgrounds Are the historical dynamics of science and art affected by political factors in the same manner This book will be of interest to philosophers but also to historians of science and historians of art alike in the reassessment it provides of recent debates on reshaping the art world using Kuhn s paradigm shift
