## **Building University Electronic Educational Environments:**

*Building University Electronic Educational Environments* Stephen D. Franklin, Ellen Strenski, 2013-03-14 The Internet and the World Wide Web are deeply affecting the way things are traditionally done E commerce is changing businesses the stock market is accessible to individuals digitized journals up to date databases and newsgroups are changing the lives of researchers Is it reasonable to think that learning will remain unaffected Nevertheless universities with their blend of teaching and research have much to offer to those who wish to learn more than simple skills judgment initiative and fair competition for research positions Over the years universities have acquired invaluable resources in the form of laboratories and libraries with specially trained staff How can they evolve to take advantage of the many possibilities of the Internet and broadband communication Many institutions of higher education are trying to integrate new information and communications technologies into current curricula or to develop new learning paradigms for learning Because it is still so early in the game they are eager to compare their efforts and results to the achievements of others and are willing to learn from them The International Federation for Information Processing IFIP is a multi national federation of professional and technical organizations founded in 1960 under the auspices of UNESCO whose mission is to assist in the development exploitation and application of Information Technology for the benefit of all peoples Given this scope of activity IFIP seemed the appropriate body to give an international dimension to such a forum

**International Working Conference on Building University Electronic Educational Environments**, 1999 *Informatics Curricula and Teaching Methods* Lillian Cassel, R. Reis, 2003-02-28 Several aspects of informatics curricula and teaching methods at the university level are reported in this volume including Challenges in defining an international curriculum The diversity in informatics curricula Computing programs for scientists and engineers Patterns of curriculum design Student interaction Teaching of programming Peer review in education This book contains a selection of the papers presented at the Working Conference on Informatics Curricula Teaching Methods and Best Practice ICTEM 2002 which was sponsored by the International Federation for Information Processing IFIP Working Group 3.2 and held in Florianopolis Brazil in July 2002 The working groups were organized in three parallel tracks Working Group 1 discussed the Directions and Challenges in Informatics Education The focus of Working Group 2 was Teaching Programming and Problem Solving Working Group 3 discussed Computing The Shape of an Evolving Discipline

**The Role of Technology in CSCL** Ulrich H. Hoppe, H. Ogata, A. Soller, 2007-06-26 This book relates new information and communication technologies ICT to their specific teaching and learning functions in particular how ICT is appropriated for and by educational or learning communities We categorize consumer oriented educational multimedia as established technologies not of primary importance for innovative approaches to collaborative learning Internet connections in schools and academic institutions are no longer new though the learning culture originating from this technology may still lack a sufficiently rich definition The technological hot spots of interest in this book are in turn

groupware or multi user technologies such as group archives or synchronous co construction environments embedded interactive technologies in the spirit of ubiquitous computing and modeling tools based on rich representations Important features of these new technologies are the move from individually oriented software tools to multi user tools providing group awareness as well as facilities for the co construction of knowledge a definition of software use beyond a single piece of software towards multiple applications or tools which are not only technically interoperable but also task and role compliant in a social situation social interoperability high interactivity and creative potential with high productive activity and initiative on the part of the user as opposed to the receptive scheme of usage of many educational multimedia applications new kinds of peripherals in the spirit of ubiquitous computing and augmented reality which allow for redefining the borderline between physical action on the one hand and virtual or symbolic on the other Encyclopedia of Distance Learning Howard, Caroline,Boettcher, Judith V.,Justice, Lorraine,Schenk, Karen D.,Rogers, Patricia L.,Berg, Gary A.,2005-04-30 This encyclopedia offers the most comprehensive coverage of the issues concepts trends and technologies of distance learning More than 450 international contributors from over 50 countries Provided by publisher **Otto E. Miller,**
