*Oncology* Leon P. Bignold, Brian L. D. Coghlan, Hubertus P.A. Jersmann, 2007-02-15 In 1890 just a few years after the discovery of the chromosomes David Paul Hansemann a pathologist in training with the famous Rudolph Virchow in Berlin produced a theory of the pathogenesis of cancer involving the key current concept that the first change which occurs in cancer is an alteration of the hereditary material of a normal cell at the site where the cancerous process begins In the process of linking cancer to chromosomal material Hansemann coined the terms anaplasia and dedifferentiation These terms have remained the basis of descriptive terms concerning the microscopical appearances of tumours ever since Nevertheless despite the popularity of his terminology Hansemann's ideas were attacked vigorously by almost all proponents of rival theories of the nature of cancer Partly due to these disputes during his life time and partly due to other factors interest in von Hansemann's ideas diminished during the twentieth century and his works are rarely mentioned today This book presents translations of all the relevant German texts and analyses the background and context of Hansemann's theories as well as the reasons why he was almost completely forgotten It shows that some of Hansemann's ideas may still be relevant to cancer research today and that he deserves to be remembered in relation to cancer as Vordenker unter den f hrenden Denkern seiner Zeit The foremost of the leading thinkers of his time

**Diseases of the Soft Structures of the Teeth and Their Treatment** Hermann Prinz, 1928 [The Americana](#), 1911 [Science, Technology, and the Art of Medicine](#) C. Delkeskamp-Hayes, Mary Ann Gardell

Cutter, 1993-04-30 Science Technology and the Art of Medicine contains papers by eminent scholars who discuss issues and concepts regarding the character of medicine. Special attention is given to the extent to which medicine is a science, art, and technology. Investigations are carried out with a particular focus on the nature of medical knowledge. Concepts of medical research, medical causality, intuition, and medical decision making are examined in the light of medicine's revolutionary advances in the twentieth century. Past perspectives and present perplexities are also examined, bringing together a volume in the philosophy of medicine that treats a broad range of issues in medical epistemology and practice in a careful, critical fashion.

## Embracing the Beat of Appearance: An Psychological Symphony within **Cellular Pathology**

In a world eaten by screens and the ceaseless chatter of instantaneous conversation, the melodic elegance and mental symphony produced by the published term often diminish in to the backdrop, eclipsed by the persistent noise and disturbances that permeate our lives. But, set within the pages of **Cellular Pathology** an enchanting literary treasure overflowing with raw thoughts, lies an immersive symphony waiting to be embraced. Constructed by a masterful composer of language, this interesting masterpiece conducts visitors on a psychological journey, skillfully unraveling the concealed melodies and profound impact resonating within each carefully crafted phrase. Within the depths of the touching examination, we will discover the book is central harmonies, analyze their enthralling publishing fashion, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
