Bronze Age Tell Communities in Context: An Exploration Into Culture, Society and the Study of European Prehistory. Part 1 Tobias L. Kienlin, 2015-07-31 This study challenges current modelling of Bronze Age tell communities in the Carpathian Basin in terms of the evolution of functionally differentiated hierarchical or proto urban society under the influence of Mediterranean palatial centres

Ruins of Identity Mark James Hudson, 1999-08-01 Many Japanese people consider themselves to be part of an essentially unchanging and isolated ethnic unit in which the biological linguistic and cultural aspects of Japanese identity overlap almost completely with each other In its examination of the processes of ethnogenesis the formation of ethnic groups in the Japanese Islands Ruins of Identity offers an approach to ethnicity that differs fundamentally from that found in most Japanese scholarship and popular discourse Following an extensive discussion of previous theories on the formation of Japanese language race and culture and the nationalistic ideologies that have affected research in these topics Mark Hudson presents a model of a core Japanese population based on the dual origin hypothesis currently favored by physical anthropologists According to this model the Jomon population which was present in Japan by at least the end of the Pleistocene was followed by agriculturalists from the Korean peninsula during the Yayoi period ca 400 BC to AD 300 Hudson analyzes further evidence of migrations and agricultural colonization in an impressive summary of recent cranial dental and genetic studies and in a careful examination of the linguistic and archaeological records The final sections of the book explore the cultural construction of Japanese ethnicity Cultural aspects of ethnicity do not emerge pristine and fully formed but are the result of cumulative negotiation Ethnic identity is continually recreated through interaction within and without the society concerned Such a view necessitates an approach to culture change that takes into account complex interactions with a larger system Accordingly Hudson considers post Yayoi ethnogenesis in Japan within the East Asian world system examining the role of interaction between core and periphery in the formation of new ethnic identities such as the Ainu He argues that the defining elements of the Ainu period and culture ca AD 1200 can be linked directly to a dramatic expansion in Japanese trade goods flowing north as Hokkaido became increasingly exploited by core regions to the south Highly original and at times controversial Ruins of Identity will be essential reading for students and scholars in Japanese studies and will be

of interest to anthropologists and historians working on ethnicity in other parts of the world Text adopted at University of Chicago
