Environmental Assessment and Land Use Planning provides an authoritative international evaluation of the SEA of land use plans. The editors place the SEA of land use plans in context and uniquely qualified contributors then evaluate systems in Canada, Denmark, Germany, Hong Kong, Hungary, Ireland, The Netherlands, New Zealand, Portugal, South Africa, Sweden, the United Kingdom, the United States, and the World Bank. These chapters provide a description of the context in each country, a case study of the use of SEA in land use planning, and an evaluation of each SEA system against a set of generic criteria specially designed to analyse different aspects of SEA. The contributors critically review each SEA system, SEA process, and SEA outcome and conclude by summarizing their findings. The editors draw the various national perspectives together in a final chapter and derive widely applicable conclusions about SEA and land use planning. This book is a core text for all students in environmental assessment, land use planning, environmental science, environmental management, development studies, geography, landscape design, and law and engineering. It is also essential reading for all governments and environmental regulators, academics, researchers, and environmental and planning consultants worldwide who are involved in SEA research, practice, and training.

Perspectives on Strategic Environmental Assessment Maria Rosario Partidario, 2024-11-01. An environmental assessment must be performed whenever a property transaction takes place. Those who don't may find themselves responsible for the past misdeeds of others. This book contains contributions by professionals from various locations who use Strategic Environmental Assessment (SEA) as a tool applied to water management issues. SEA helps make decisions that increase sustainability. Because of its procedural nature, it necessarily becomes tailor-made to different applications. Easily understood and geographic in scope, this book presents leading edge thinking and first-hand knowledge on the applications of SEA in water management. **Perspectives on Strategic Environmental Assessment** is a comprehensive guidebook for performing environmental assessments all over the world. No other source provides you with as much information on the applications of SEA as a policy assessment and management tool. This book provides a blueprint for environmental assessments that safeguards you from the oversights of others.

Taking Stock of Environmental Assessment Jane Holder, Donald McGillivray, 2007-11-13. Examining the relationship between law, environmental governance, and the regulation of decision-making, this volume, both reflective and contextual in approach, uses a wide range of theories to explore the key features of modern environmental assessment.
