K. Ching, Barry S. Onouye, Douglas Zuberbuhler, 2014-03-04 A new edition of Francis D K Ching's illustrated guide to structural

design Structures are an essential element of the building process yet one of the most difficult concepts for architects to grasp While structural engineers do the detailed consulting work for a project architects should have enough knowledge of structural theory and analysis to design a building Building Structures Illustrated takes a new approach to structural design showing how structural systems of a building such as an integrated assembly of elements with pattern proportions and scale are related to the fundamental aspects of architectural design The book features a one stop guide to structural design in practice a thorough treatment of structural design as part of the entire building process and an overview of the historical development of architectural materials and structure Illustrated throughout with Ching's signature line drawings this new Second Edition is an ideal guide to structures for designers builders and students Updated to include new information on building code compliance additional learning resources and a new glossary of terms Offers thorough coverage of formal and spatial composition program fit coordination with other building systems code compliance and much more Beautifully illustrated by the renowned Francis D K Ching Building Structures Illustrated Second Edition is the ideal resource for students and professionals who want to make informed decisions on architectural design *Structure for Architects* Ramsey Dabby, Ashwani Bedi, 2012-04-17 An introduction to the concepts and principles of architectural structures in an easy to read format Written as an easy to understand primer on the topic Structure for Architects engages readers through instruction that uses a highly visual format and real world examples to underline the key facets of structural principles that are essential to the design process Eschewing complicated mathematics and technical jargon Structure for Architects demystifies the subject matter by showing it in the context of everyday situations giving architects and architectural technologists a clear understanding of how to incorporate structural principles into their designs Highlights of this book include A rich collection of drawings photographs and diagrams spread throughout the text which demonstrate fundamental structural concepts using everyday examples An overview of structural design basics as well as a summary of structural forms A look at the design implications of steel reinforced concrete and wood By providing an overall view of structures that covers the essentials of what architects and architectural technologists need to know Structure for Architects is a valuable tool for illustrating the importance of designing with structure in mind and for learning the basics that are necessary for collaborating confidently with project team members Building Structures R. E. Shaeffer, 1980 **Building Science Series** United States. National Bureau of Standards, 1968 Intumescent Coatings for Fire Protection of Building Structures and Materials Olga Zybina, Marina Gravit, 2020-11-04 The book provides practical recommendations for creation of fire retardant materials with an increased service life The enhanced fire resistance seen in these materials is based on the regularities of the chemical and physicochemical interaction of the components of intumescent composition in the process of thermolytic synthesis of heat insulating char foamed layers The aim of fire protection of various objects with intumescent materials is to create a heat insulating charred layer on the surface of structural elements this layer can withstand high temperatures and mechanical

damage which are typical during fires The authors describe the contribution of basic components melamine pentaerythritol ammonium polyphosphate additional components chlorinated paraffin urea cellulose carbon nano additives etc and polymer binders of intumescent compositions on the process of charring The technological aspects of manufacturing application and operation of fire retardant intumescent compositions which can be useful for organizations that produce and use fire retardant materials are also described

The Design of Building Structures Wolfgang Schueller,1996 Rather than relying on separate literature in the fields of structural engineering architecture construction and history this text presents the field of structures holistically in terms of building and architecture Buildings are studied from all points of view geometrical aesthetic historical functional environmental and construction providing the broadest treatment of structures available Descriptive analytical and graphical treatment of topics are presented with nearly equal emphasis Numerous case studies throughout exemplify structural concepts and develop a feeling for structure and form instead of supporting specific architectural styles or structural acrobatics Teaching in the context of building structure and form i e low rise high rise long span etc allows students to understand structures on real not abstract mathematical terms Structural systems i e frames arches space frames soft shells etc and how they aid in making space and enhancing the formal presentation of a structure are discussed in detail Chapter 3 deals with approximate design methods for steel wood reinforced concrete and prestressed concrete according to the
