Centennial Summer:

The Golden Age Musicals of Darryl F. Zanuck Bernard F. Dick, 2022-03-30 Beginning with *The Jazz Singer* 1927 and *42nd Street* 1933 legendary Hollywood film producer Darryl F. Zanuck 1902-1979 revolutionized the movie musical cementing its place in American popular culture. Zanuck, who got his start writing stories and scripts in the silent film era, worked his way to becoming a top production executive at Warner Bros. in the later 1920s and early 1930s. Leaving that studio in 1933, he and industry executive Joseph Schenck formed Twentieth Century Pictures, an independent Hollywood motion picture production company. In 1935, Zanuck merged his Twentieth Century Pictures with the ailing Fox Film Corporation, resulting in the combined Twentieth Century Fox, which instantly became a new major Hollywood film entity.

The Golden Age Musicals of Darryl F. Zanuck The Gentleman Preferred Blondes is the first book devoted to the musicals that Zanuck produced at these three studios. The volume spotlights how he placed his personal imprint on the genre and how especially at Twentieth Century Fox he nurtured and showcased several blonde female stars who headlined the studio's musicals, including Shirley Temple, Alice Faye, Betty Grable, Vivian Blaine, June Haver, Marilyn Monroe, and Sheree North. Building upon Bernard F. Dick's previous work in *That Was Entertainment: The Golden Age of the MGM Musical*, this volume illustrates the richness of the American movie musical, tracing how these song and dance films fit within the career of Darryl F. Zanuck and within the timeline of Hollywood history.

Climate Change and Variability Suzanne Simard, 2010-08-17 Climate change is emerging as one of the most important issues of our time, with the potential to cause profound cascading effects on ecosystems and society. However, these effects are poorly understood, and our projections for climate change trends and effects have thus far proven to be inaccurate. In this collection of 24 chapters, we present a cross-section of some of the most challenging issues related to oceans, lakes, forests, and agricultural systems under a changing climate. The authors present evidence for changes and variability in climatic and atmospheric conditions, investigate some of the impacts that climate change is having on the Earth's ecological and social systems, and provide novel ideas, advances, and applications for mitigation and adaptation of our socio-ecological systems to climate change. Difficult questions are asked: What have been some of the impacts of climate change on our natural and managed ecosystems? How do we manage for resilient socio-ecological systems? How do we predict the future? What are relevant climatic change and management scenarios? How can we shape management regimes to increase our adaptive capacity to climate change? These themes are visited across broad spatial and temporal scales, touch on important and relevant ecological patterns and processes, and represent broad geographic regions from the tropics to temperate and boreal regions to the Arctic.
