Hadron Physics A.H. Blin,Birgit Hiller,A.A. Osipov,M.C. Ruivo,E. van Beveren,2003-04-04 New theories are explored and discussed on establishing relations between the fundamental theory of strong interactions known as QCD and experiment Powerful theoretical models known as effective theories based on symmetries of QCD have been developed to address the non perturbative regime of QCD in an approximate yet quantitatively controllable way The present workshop focussed on the most recent developments in this area New results on meson and baryon physics are discussed as well and new directions towards the possible experimental confirmation of nuclear quark matter and quark gluon plasma are indicated
