Cultural Conceptions of Mental Health and Therapy Anthony J. Marsella, G. White, 2012-12-06 Within the past two decades there has been an increased interest in the study of culture and mental health relationships This interest has extended across many academic and professional disciplines including anthropology psychology sociology psychiatry public health and social work and has resulted in many books and scientific papers emphasizing the role of sociocultural factors in the etiology epidemiology manifestation and treatment of mental disorders It is now evident that sociocultural variables are inextricably linked to all aspects of both normal and abnormal human behavior But in spite of the massive accumulation of data regarding culture and mental health relationships sociocultural factors have still not been incorporated into existing biological and psychological perspectives on mental disorder and therapy Psychiatry the Western medical specialty concerned with mental disorders has for the most part continued to ignore socio cultural factors in its theoretical and applied approaches to the problem The major reason for this is psychiatry s continued commitment to a disease conception of mental disorder which assumes that mental disorders are largely biologically caused illnesses which are universally represented in etiology and manifestation Within this perspective mental disorders are regarded as caused by universal processes which lead to discrete and recognizable symptoms regardless of the culture in which they occur However this perspective is now the subject of growing criticism and debate

*Exploring Cultural Conceptions of the Transitions to Adulthood* Nancy L. Galambos, Jeffrey Jensen Arnett, 2003-06-27 The transition to adulthood has been studied for decades in terms of transition events such as leaving home finishing education

and entering marriage and parenthood but only recently have studies examined the conceptions of young people themselves on what it means to become an adult The goal of this volume is to extend the study of conceptions of adulthood to a wider range of cultures The chapters in this volume examine conceptions of adulthood among Israelis Argentines American Mormons Germans Canadians and three American ethnic minority groups There is a widespread emphasis across cultures on individualistic criteria for adulthood but each culture has been found to emphasize culturally distinctive criteria as well This volume represents a beginning in research on cultural conceptions of the transition to adulthood and points the way to a broad range of opportunities for future investigation This is the 100th issue of the quarterly report *New Directions for Child and Adolescent Development* *Cultural Conceptions of Mental Health and Therapy* Anthony J Marsella,G White,1984-05-31

**Cultural Conceptions and Mental Illness** John Marshall Townsend,1978 **Conceptions of Culture** Thomas E. Wren,2012-07-16 The concept of culture stands clearly but unsteadily at the heart of multicultural education This book provides a systematic in depth understanding of the role that culture plays in the massive literature of multicultural education as multiple and antithetical definitions of culture exist The book also shows multicultural educators how to discern the definition used in any particular book or article Thomas Wren deploys methods and concepts from philosophy and the social sciences to provide an analytic framework within which the history and current state of culture theory can be understood both for its own sake and for its educational significance Although the book is full of theory it is not a theoretical book in the usual sense It is a road map accompanied by the related theoretical information and tools that graduate students and faculty need to 1 navigate the complex terrain of multicultural education literature 2 apply the book s analytical framework to that literature and to their own future practice and 3 anticipate the social changes and accompanying conceptual changes in our notions of culture that are now occurring as part of the cultural hybridity of today s students

**Cultural Conceptions** Valerie Hartouni,1997 Examines the meaning of life in an era of emerging biotechnology What happens to prevailing beliefs about the uniqueness of individual life when life can be cloned Or to traditional understandings of family relationships when a child can have up to five parents These are some of the questions addressed by Valerie Hartouni in her consideration of the cultural effects of new reproductive technologies as reflected in video images popular journalism scientific debates legal briefs and policy decisions In *Cultural Conceptions* Hartouni tracks the circulation and communication of various myths images and stories pertaining to new reproductive technologies and their effects both imagined and real during the past two decades While addressing topics ranging from surrogacy and cloning to adoption ultrasound imaging and abortion Hartouni looks to American popular culture for clues to what these new and not so new reproductive practices tell us about issues of personhood Hartouni investigates the emergence of new anxieties about the nature of selfhood as well as the recurrence of age old myths regarding individuality sexuality property and family She argues that both are being played out in cultural contests over the meaning and organization of women s reproductive

capacity In her discussion of provocative issues such as The Bell Curve controversy and the Baby M case Hartouni traces the dialectic of crisis and containment unleashed by reproductive technologies Ultimately however Cultural Conceptions argues that the anxieties that surround new reproductive technologies provide openings for alternative understandings and practices of life to emerge and challenge those currently in place A thoughtful daring and original look at this complex set of issues Cultural Conceptions provides an much needed guide to our nation s psyche as we approach the new millennium
