Culture And Styles Of Academic Discourse:

Culture and Styles of Academic Discourse Anna Duszak, 2011-06-24 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Culture & Style in Academic Discourse a duszak, 1997

Academic Discourse across Cultures Igor Lakić, Milica Vuković, Branka Živković, 2015-09-10 Academic discourse has recently become a blooming field of research for linguists interested in genre and discourse analysis as well as pragmatics. The methodology and conventions employed in academic discourse however vary across cultures to a certain degree and often represent obstacles for publishing in international journals for authors whose native language is not English as top journals tend to centre on the Anglo Saxon academic writing norms. This is one of the major reasons why national academic discourses need to be linguistically profiled and studied and contrastively compared against these norms. This volume contributes to this very objective by shedding light on academic discourse as effectuated in various mostly Balkan countries and contrasts it against the corresponding western English discourse. Furthermore academic discourse is studied through a variety of genres it can assume such as research articles, conference proceedings and university lectures. Through exploring the cultural differences in academic discourse and the standards of international academic writing this volume offers readers a chance to become better equipped in publishing abroad. Opening with a chapter focusing on the general structure of research articles and national writing habits as a potential hindrance to publishing abroad the book goes on to study the rhetorical structure of the abstracts, introductions and conclusions of research articles in linguistics, economics and civil engineering. The second part of the book deals with hedging contrastively studied in international and national journals with the following chapters studying cohesion as accomplished in academic writing. Part three deals with the syntactic and semantic features of academic discourse. This book will be of particular interest to linguists interested in genre and discourse analysis in general and academic discourse and will also appeal to scholars from other research backgrounds wishing to familiarise themselves with international and national academic conventions and thus overcome the hurdles relating to academic writing conventions when publishing abroad.

Academic Discourse John Flowerdew, 2014-06-11 Academic Discourse presents a collection of

specialty commissioned articles on the theme of academic discourse Divided into sections covering the main approaches each begins with a state of the art overview of the approach and continues with exemplificatory empirical studies Genre analysis corpus linguistics contrastive rhetoric and ethnography are comprehensively covered through the analysis of various academic genres research articles PhD these textbooks argumentative essays and business cases Academic Discourse brings together state of the art analysis and theory in a single volume It also features an introduction which provides a survey and rationale for the material implications for pedagogy at the end of each chapter topical review articles with example studies a glossary The breadth of critical writing and from a wide geographical spread makes Academic Discourse a fresh and insightful addition to the field of discourse analysis

Discoursal Construction of Academic Identity in Cyberspace

Małgorzata Sokół,2011-10-18 The aim of this volume is to look into how academic identity is discursively constructed in CMC computer mediated communication using the example of an e seminar An e seminar is an asynchronous type of CMC where private public and institutional domains merge and therefore it provides an interesting context for exploring academic communication phenomena in cyberspace The linguistic cues of academic identity can be identified on three levels of discourse organisation the features of lexico grammar textual macrostructures and genres In general the analysis shows how these three levels of discourse organisation contribute towards how academics negotiate their identities relative to the aims and activities of their discourse communities and relative to their individual goals The discursal construction of academic identity in electronic discourse depends also on such factors as the medium s defining properties and the lack of direct physical contact between interactants An important finding is the confirmation of the individuating character of the medium i e the authors self presentation in an e seminar is characterised by their distinctive voice and increased self disclosure Communication in this context enhances individuality which bears important consequences for how academics negotiate their identity in electronic discourse exploiting the possibilities offered by the new medium The results of the analysis reveal how important it is for scholars to maintain a legitimate identity in an e seminar Virtual academic identity as constructed in this context is as an extension of academic identity constructed in the real world The new communicative medium seems to have extended the repertoire of effective means of self promotion and the presentation of academic achievements and expertise These aspects have become important for academic interaction in today s world which is characterised by such phenomena as the internationalisation and globalisation of scholarship commodification of science and intensified competition The book will be of interest to students and researchers in the fields of discourse analysis academic literacy rhetoric and genre studies and to all those concerned with the complexities of identity work in the context of computer mediated communication

Dialogue and Culture

Marion Grein,Edda Weigand,2007-12-06 The volume deals with the relationship between language dialogue human nature and culture by focusing on an approach that considers culture to be a crucial component of dialogic interaction Part I refers to the so called language instinct debate between nativists and

empiricists and introduces a mediating position that regards language and dialogue as determined by both human nature and culture This sets the framework for the contributions of Part II which propose varying theoretical positions on how to address the ways in which culture influences dialogue Part III presents more empirically oriented studies which demonstrate the interaction of components in the mixed game and focus in particular on specific action games politeness and selected verbal means of communication

Voices, Identities, Negotiations, and Conflicts: Writing Academic English Across Cultures Le-Ha Phan,Bradley Baurain,2011-01-27 Provides insights into the process of knowledge construction in EFL ESL writing from classrooms to research sites from the dilemmas and risks NNEST student writers experience in the pursuit of true agency to the confusions and conflicts academics experience in their own writing practices

Academic Writing Eija Ventola,Anna Mauranen,1996-03-15 Writing is crucial to the academic world It is the main mode of communication among scientists and scholars and also a means for students for obtaining their degrees The papers in this volume highlight the intercultural generic and textual complexities of academic writing Comparisons are made between various traditions of academic writing in different cultures and contexts and the studies combine linguistic analyses with analyses of the social settings in which academic writing takes place and is acquired The common denominator for the papers is writing in English and attention is given to native English writers and non native writers problems in different disciplines The articles in the book introduce a variety of methodological approaches for analyses and search for better teaching methods and ways of improving the syllabi of writing curricula The book as a whole illustrates how linguists strive for new research methods and practical applications in applied linguistics

Word ,1999 *Cultural Differences in Academic Rhetoric* Anna Mauranen,1993 Academic writing is rhetorical and culturally conditioned What in one culture appears as effective and proper can in a new cultural context look like chaotic writing and sloppy thinking To discover the ways in which such impressions are made we need careful textual analysis of academic writing in different cultural contexts This book takes a textlinguistic approach and contrasts academic journal articles in a large and dominant culture Anglo American a small and peripheral one Finnish and the intercultural products of the small culture members writing in the dominant language Finns in English The results indicate that academics do have culture specific writing styles and that textlinguistic tools are crucial if we want to expand our understanding of written communication

The Crosscultural, Language, and Academic Development Handbook Lynne T. Díaz-Rico,Kathryn Z. Weed,1995 **Es** ,2004 *Culture's Software* Dorota Brzozowska,Władysław Chłopicki,2015-09-10 When Geert Hofstede famously defined culture as collective programming of the mind the definition broadly referred to culture as such including all the layers in his onion model The title of this volume Culture s Software represents a development of this original idea and was inspired by none other than Professor Hofstede himself He used this phrase over thirty years later when lecturing to an international group of scholars gathered in Poland to debate the idea of cultural communication styles which has in recent years been fruitfully discussed from a fresh perspective

by scholars working within cognitive and cultural linguistics The debate has given rise to this book which will inspire further research into this fascinating subject

Colony and Empire William G. Robbins, 1994 A forceful analysis of the role of capitalism in the history of the American West This is an important contribution to the new western history that should be read by both historians and residents of the American West *Journal of American History* This exciting book should take its place on the shelf next to Patricia Limerick's *The Legacy of Conquest Forest Conservation History* *A Disquisition on government and a discourse on the Constitution and government of the United States* John Caldwell Calhoun, 1883

Cross-Linguistic and Cross-Cultural Perspectives on Academic Discourse Eija Suomela-Salmi, Fred Dervin, 2009-11-19 The goal of this volume is to examine academic discourse AD from cross linguistic and cross cultural perspectives The adjective Cross cultural in the volume title is not just limited to national contexts but also includes a cross disciplinary perspective Twelve scientific fields are under scrutiny in the articles One of the unique aspects of the volume is the inclusion of a variety of foreign languages English as a lingua franca Spanish French Swedish Russian German Italian and Norwegian Besides in several articles dealing with oral AD comparisons and parallels are also established with written AD The research methodologies used in the studies are varied and they offer an overview of the diversity and richness of approaches to AD All in all it is hoped that the volume appeals not only to young researchers but also to confirmed scholars interested in cross linguistic and cross cultural aspects of AD It will also be of interest to language teachers or teachers who are involved with e.g. international students and academic mobility

Teaching Working Class Sherry Lee Linkon, 1999 Since the 1970s working class individuals have made up an increasing proportion of students enrolled in institutions of higher education At the same time working class studies has emerged as an academic discipline updating a long tradition of scholarship on labour history and proletarian literature to include discussions of working class culture intersections of class with ethnicity and studies of the representation of the working class in popular culture These developments have generated ideas about teaching that incorporate both a sensitivity to the working class roots of many students and the inclusion of course content informed by an awareness of class culture
