Alanson White,Smith Ely Jelliffe,1913 This volume devoted to the treatment of nervous and mental diseases is designed to
meet the needs which the rapid advances in knowledge of neurology and psychiatry have created The nervous system is here
regarded as a whole and as inclusive of the mind and it is maintained that disturbances of any and all of its functions mental
as well as physical are proper subjects for therapeutics The present work lays emphasis upon the psychical side of life as
being worth quite as much consideration as the physical It sets forth doctrines of nervous and mental hygiene reconstructive
factors in social organization as applied to human ills and endeavors to present a broad front to the pessimistic nihilism in
therapeutics that has been too long current in these fields because the doctor s eyes have been too closely focused on the
individual examples and results of human accidents Neurology and psychiatry offer the widest possible opportunities for
preventive medicine as well as for therapeutic optimism The program here presented is essentially therapeutic Planned as it
has been on a broad scale the more practical issues confronting the clinician have nevertheless been fully met The editors
have sacrificed philosophical views for more definite guideposts wherever in the present state of our knowledge such a
course seemed wiser PsycINFO Database Record c 2005 APA all rights reserved *The Practitioner's Handbook of*
