Current Issues In Symbiotic Nitrogen Fixation:

Current Issues in Symbiotic Nitrogen Fixation G.H. Elkan,R.G. Upchurch,2012-12-06 In the 100 years since the legume Rhizobium symbiotic nitrogen fixation interaction was first described interest in this field has grown rapidly The types of studies have been cyclical in nature involving a cross section of disciplines The availability of cheap nitrogenous fertilizers caused much of the biological nitrogen fixation research to become more theoretical in the developed world The high cost of energy coupled with environmental concerns and the interest in sustainable agriculture has stimulated research in symbiotic nitrogen fixation The development of modern genetic techniques has resulted in interdisciplinary research on plant microbe interactions controlling nitrogen fixation This has resulted in a better understanding of environmental factors influencing the nodulation process chemical signalling between the symbiotic partners and the nature of the specificity between host plant and microsymbiont This volume summarizes the diverse research efforts in biological nitrogen fixation by presenting a collection of papers in the areas of physiology and metabolism taxonomy and evolution genetics and ecology Current Issues in Symbiotic Nitrogen Fixation Gerald H. Elkan,Robert G. Upchurch,1997 *Microbial Physiology* S. Ram Reddy,S.M. Reddy,2008-06-01 This book the first of its kind by Indian authors tries to develop a comprehensive understanding of microbial metabolism It deals with all basic and unique physiological aspects of microorganisms in an ordered sequence with profuse illustrations Discussion of all chapters is based on the concepts of bioenergetics which form the life line of metabolic functions It provides the foundation and general frame work for further understanding of the subject This book not only serves as a text for undergraduate post graduate students but also as a reference book to teachers researchers and all others interested in the metabolism of the microorganisms in particular and living organisms in general **Topics in Ecological and Environmental Microbiology** Thomas Mitchell Schmidt,Moselio Schaechter,2011-09-28 This book provides an overview of ecological aspects of the metabolism and behavior of microbes microbial habitats biogeochemical cycles and biotechnology It was designed by selecting relevant chapters from the comprehensive Encyclopedia of Microbiology 3rd edn and inviting the original authors to update their material to include key developments and advances in the field **Plant Roots - From Cells to Systems** H.M. Anderson,Peter W. Barlow,D.T. Clarkson,M.B. Jackson,Peter R. Shewry,2012-12-06 Proceedings of the 14th Long Ashton International Symposium Plant Roots From Cells to Systems held in Bristol UK 13 15 September 1995 Biotechnology Applications in Forestry Fred O Asiegbu,Andriy Kovalchuk,2025-01-20 Biotechnology Applications in Forestry Forest Microbiology Volume Four in the Forest Microbiology series is a comprehensive exploration of harnessing the unique attributes of the microbes in the forest biome and their tree hosts The book introduces the basics of genomics applied bioinformatics and next generation sequencing providing a firm foundation before moving to specific approach application and use chapters Further sections explore opportunities through the use of genetics to expand or improve on many of these positive attributes of forest trees and associated organisms including adaptation to climate change

as well as resilience to biotic and abiotic stressors Novel techniques and current advances in the application of modern biotechniques in tree health protection mushroom technology biological control biochar bioenergy Isolate strain selection metabolic engineering and commercial application relevant for forest ecosystem are also addressed Outlines novel approaches in the use of fungi or bacteria for biocontrol of insect pests and invasive plant species Highlights the many functions and uses of forest microbes as biofertilizers in soil fertility and in bioremediation including phytoremediation Addresses major industrial and biotechnological applications of forest microbes Environmental Concerns and Sustainable Development Vertika Shukla, Narendra Kumar, 2019-04-30 The current global environmental crisis is primarily the result of non standardized parameters for environmental regulation and is impacting e g clean air safe drinking water and the quality of food particularly in developing nations Due to their poor lax execution of EIA protocols newly developing countries are preferred destinations for establishing pollution emitting industries which results in the degradation and depletion of their natural resources Lack of environmental policy intervention is another major incentive to base dirty industries in these nations In order to ensure sustainable development the highest priority issues include the monitoring and eradication of environmental problems stemming from economic development virtually every form of economic development primarily results in the loss of forests and thus biodiversity followed by declining air quality and the contamination of natural resources Sustainable development ensures responsible interactions with the environment so as to minimize the depletion or degradation of natural resources and preserve environmental quality It involves integrated approaches to understanding the importance of environmental management systems and policy measures that lead to improved environmental performance This book addresses the environmental concerns associated with economic development and with approaches to attaining sustainable economic development which include monitoring the quality of water resources soil erosion and degradation of the natural environment **Ecology of Arable Land – Perspectives and Challenges** M. Clarholm, L. Bergström, 2012-12-06 Agriculture in the industrial world has gone A common interest of the contributors is increas through dramatic changes over the past decades ing the understanding of the turnover of carbon Mechanization in combination with high inputs of and inorganic nutrients in terrestrial ecosystems fertilizers and pesticides has turned deficits of agri The authors approach this topic from different cultural products into surplus Over the same directions depending on their interests and ex period we have experienced increased environment pertise Difficulties are identified in the quantifica al problems in both the atmosphere and our water tion of below ground production where death and resources which have been associated with the re growth if incorporated into the calculations changes in management practices can change production figures considerably as Concern about the potential pollution by compared to values derived from peak estimates nitrogen fertilizers as well as the low utilization The role of root derived carbon is investigated in efficiency of applied nitrogen by plants has created relation to nutrient competition between roots and a need for a better understanding of nitrogen

Vance,2012-12-06 During the past three decades there has been a large amount of research on biological nitrogen fixation in part stimulated by increasing world prices of nitrogen containing fertilizers and environmental concerns In the last several years research on plant microbe interactions and symbiotic and asymbiotic nitrogen fixation has become truly interdisciplinary in nature stimulated to some degree by the use of modern genetic techniques These methodologies have allowed us to make detailed analyses of plant and bacterial genes involved in symbiotic processes and to follow the growth and persistence of the root nodule bacteria and free living nitrogen fixing bacteria in soils Through the efforts of a large number of researchers we now have a better understanding of the ecology of rhizobia environmental parameters affecting the infection and nodulation process the nature of specificity the biochemistry of host plants and microsymbionts and chemical signalling between symbiotic partners This volume gives a summary of current research efforts and knowledge in the field of biological nitrogen fixation Since the research field is diverse in nature this book presents a collection of papers in the major research area of physiology and metabolism genetics evolution taxonomy ecology and international programs **Cumulative Book Index** ,1998 A world list of books in the English language
