Culture and Conscience William Creighton Graham, Herbert Gordon May, 1936 *Study of Prehistoric Aesthetic Consciousness of the Chinese Nation* Wangheng Chen, 2025-07-29 This book explores how prehistoric aesthetic consciousness of the Chinese nation evolved from animality and barbarism how it was epitomized in prehistoric artifacts and most importantly how this aesthetic consciousness has exerted an ever lasting influence upon the Chinese mind and culture by examining prehistoric archaeological discoveries particularly pottery objects jade ware and rock paintings from prehistoric cultures and by studying ancient Chinese historical and literary documents This is the first academic effort to trace the very beginning of the aesthetic consciousness of the Chinese nation back to prehistoric times Its strength lies in the comprehensive and detailed examination of all the major prehistoric cultures and artifacts as well as in its insights into the relationship between prehistoric consciousness and the Chinese mind and culture This book benefits graduate students and researchers who are interested in Chinese prehistoric culture and Chinese history of aesthetics **Catalog of the Oriental Institute Library, University of Chicago** University of Chicago. Oriental Institute. Library, 1970 Inside the Neolithic Mind: Consciousness, Cosmos, and the Realm of the Gods David Lewis-Williams, David Pearce, 2005-10-01 An exploration of how brain structure and cultural content interacted in the Neolithic period 10 000 years ago to produce unique life patterns and belief systems What do the headless figures found in the famous paintings at Catalhoyuk in Turkey have in common with the monumental tombs at Newgrange and Knowth in Ireland How can the concepts of birth death and wild cast light on the archaeological enigma of the domestication of cattle What generated the revolutionary social change that ended the Upper Palaeolithic David Lewis Williams s previous book *The Mind in the Cave* dealt with the remarkable Upper Palaeolithic paintings carvings and engravings of western Europe Here Dr Lewis Williams and David Pearce examine the intricate web of belief myth and society in the succeeding Neolithic period arguably the most significant turning point in all human history when agriculture became a way of life and the fractious society that we know today was born The authors focus on two contrasting times and places the beginnings in the Near East with its mud brick and stone houses each piled on top of the ruins of another and western Europe with its massive stone monuments more ancient than the Egyptian pyramids They argue that neurological patterns hardwired into the brain help explain the art and society that Neolithic people produced Drawing on the latest research the authors skillfully link material on human consciousness imagery and religious concepts to propose provocative new theories about the causes of an ancient revolution in cosmology and the origins of social complexity In doing so they create a fascinating neurological bridge to the mysterious thought lives of the past and reveal the essence of a momentous period in human history 100 illustrations 20 in color **Consciousness, Creativity, and Self at the Dawn of Settled Life** Ian Hodder, 2020-03-05 Over recent years a number of scholars have argued that the human mind underwent a cognitive revolution in the Neolithic This volume seeks to test these claims at the Neolithic site of atalh y k in Turkey and in

other Neolithic contexts in the Middle East It brings together cognitive scientists who have developed theoretical frameworks for the study of cognitive change archaeologists who have conducted research into cognitive change in the Neolithic of the Middle East and the excavators of the Neolithic site of atalh y k who have over recent years been exploring changes in consciousness creativity and self in the context of the rich data from the site Collectively the authors argue that when detailed data are examined theoretical evolutionary expectations are not found for these three characteristics The Neolithic was a time of long slow and diverse change in which there is little evidence for an internal cognitive revolution
