Breeding Terrarium Animals:

Breeding Terrarium Animals Elke Zimmermann, 1986 *Breeding Food Animals* Ursula Friederich, Werner Volland, 2004
Learn how to successfully breed live food for the animals in your care with this guide for all professional and amateur vivarium owners It provides easy to follow instructions for the development of long term breeding environments for food animals and describes in detail how to raise a wide variety of live food such as plankton worms crustaceans mollusks insects mammals such as mice and rats and includes some live foods that are rarely used This book offers advice and should answer questions that might arise during the raising of food for the vivarium It contains information that is necessary in providing your vivarium animal with a healthier longer life *The Vivarium* ,1998 [Tropical Fish Hobbyist](#) ,1991 **Green Anoles**
Philippe de Vosjoli, 2012-01-10 A popular beginner s lizard the green anole is the perfect introduction to the world of reptiles and continues to be popular among new herp lovers These tiny neat little lizards with the intense black eyes have suffered the fate of goldfish as they ve been marketed by pet shops as cheap easy care insect eating reptiles In order to keep green anoles thriving in their vivaria pet owners must approach their husbandry with care and respect Philippe de Vosjoli s Green Anoles provides the precise information necessary to reach that goal The book begins with a chapter about the characteristics and behavior natural history and anatomy of green anoles all of which is critical information for a keep to better understand the needs of his or her pet As pets green anoles are best kept in their vivaria and not handled so the setup of a beautifully landscaped vivarium with proper lighting heat humidity ventilation and substrate is key This *Advanced Vivarium Systems* title offers complete information about housing feeding and nutrition diseases and disorders and breeding as well as how to set up naturalistic vivaria for one or more anoles or a community of anoles and compatible species The chapter on other anoles recommends some very attractive species for the beginning lizard keeper to expand his anole family such as the brown anole big headed anole Cuban or knight anole and Jamaican anole The finale chapter on compatible species includes descriptions and photographs of a half dozen interesting options such as the flying gecko pigmy skink and green tree frog Resources and index included *The Terrarium* Harald Jes, 1998 Here are detailed instructions for designing building and maintaining a home terrarium Also included are instructions for maintaining terrarium plant life plus advice on caring for frogs lizards snakes and other animals appropriate for terrarium **Conservation of Endangered Species in Captivity** Edward F. Gibbons Jr., Barbara S. Durrant, Jack Demarest, 1995-08-31 This multi disciplinary approach to conservation of endangered species in captivity is organized taxonomically and by scientific discipline The seven taxonomic groups included are invertebrates fish reptiles and amphibians birds marine mammals primates and other mammals Within each taxonomic group four scientific disciplines are explored conservation reproductive physiology behavior and captive design Conservation chapters summarize the status of the taxonomic group both in the wild and in captivity Reviewed in the reproductive physiology chapters are anatomy endocrinology and physiology for females and males of the taxonomic group In

the section on behavior the functions of captive animal research the methods used and the problems encountered are discussed And in examining captive design the authors provide a general historical outline of the philosophies trends and scientific issues for the targeted taxonomic group

The Eponym Dictionary of Amphibians Bo Beolens, Michael Watkins, Michael Grayson, 2013-04-22 New species of animal and plant are being discovered all the time When this happens the new species has to be given a scientific Latin name in addition to any common vernacular name In either case the species may be named after a person often the discoverer but sometimes an individual they wished to honour or perhaps were staying with at the time the discovery was made Species names related to a person are eponyms Many scientific names are allusive esoteric and even humorous so an eponym dictionary is a valuable resource for anyone amateur or professional who wants to decipher the meaning and glimpse the history of a species name Sometimes a name refers not to a person but to a fictional character or mythological figure The Forest Stubfoot Toad *Atelopus farci* is named after the FARC a Colombian guerrilla army who found refuge in the toad's habitat and thereby it is claimed protected it Hoipollo's Bubble nest Frog *Pseudophilautus hoipolloi* was named after the Greek for the many but someone assumed the reference was to a Dr Hoipollo Meanwhile the man who has everything will never refuse an eponym Sting's Treefrog *Dendropsophus stingi* is named after the rock musician in honour of his commitment and efforts to save the rainforest Following the success of their Eponym Dictionary of Reptiles the authors have joined forces to give amphibians a similar treatment They have tracked down 1 609 honoured individuals and composed for each a brief pithy biography In some cases these are a reminder of the courage of scientists whose dedicated research in remote locations exposed them to disease and even violent death The eponym ensures that their memory will survive aided by reference works such as this highly readable dictionary Altogether 2 668 amphibians are listed

The Veterinary Annual, 1989 [An Introduction to the Amphibians of Ecuador](#) Luis A. Coloma, William E. Duellman, 2024-12-27 *An Introduction to the Amphibians of Ecuador* is the first of four volumes which are comprehensive well illustrated and authoritative works making them invaluable to biologists conservationists and others This initial volume delves into the cultural history of amphibians encompassing ethnobatrachology and folklore while summarizing the amphibian iconography found in Ecuadorian archaeology Moreover it covers topics such as bioprospecting sustainable management and biotrade activities The history and present state of amphibian biology research are also addressed Furthermore it explores in comprehensive detail the rich amphibian diversity of Ecuador providing a thorough review of biogeography amphibian declines and conservation Subsequent volumes list the characteristics of each species define each taxon and compare them to similar other species Natural history and reproductive behavior where known are described as are data on vocalizations larvae and ontogenetic changes Amphibian distributions are illustrated with physiographic maps with dots Each volume addresses the declines extinctions and conservation status of each species and provides notations of their occurrence in reserves
