Breakdown Of Nations:

The Breakdown of Nations Leopold Kohr, 2017-01-01 A fascinating manifesto proposing that the world should be split into smaller regions to distribute power more evenly. Written by one of the most original political thinkers of the 20th century in *The Breakdown of Nations*, Leopold Kohr shows that throughout history people living in small states are happier, more peaceful, more creative, and more prosperous. He argues that virtually all our political and social problems would be greatly diminished if the world's major countries were to dissolve back into the small states from which they sprang. Rather than making even larger political unions in the mistaken belief that this will bring peace and security, we should minimize the aggregation of power by returning to a patchwork of small, relatively powerless states where leaders are accessible to and responsive to the people. Originally published in 1957, this new edition features forewords by Neal Ascherson and Richard Body. The material has been noted for its striking relevance to the current political situation with globalisation, war, nuclear weapons, and the rise of electronic gadgets leading to concern over whether we should re-examine the implications of the size of political groupings, whether they be states, nations, or federations. In these turbulent times, recognise the beauty and potential in small political nations with this inspiring read. The Zeronauts John Elkington, 2012 In the last century, astronauts launched into the heavens in search of new worlds to colonize, their adventures helping to catalyze the evolution of everything from non-stick frying pans and minicomputers to satellite telecommunications. Their work forced our species to recognize that our Earth is a very rare planet indeed and our only home for the foreseeable future. Now a new wave of explorers, adventurers, and entrepreneurs is pioneering novel ways to create wealth in tune with the twenty-first century reality of a human population pushing towards 10 billion people by mid-century and with key elements of the planet's biosphere already coming apart at the seams. These are the Zeronauts. Featuring contributions by 25 of the world's leading innovators and drawing on interviews and surveys of many more, the book showcases the pioneers that are at the cutting edge of the global sustainability movement, which the author John Elkington has helped create and lead over several decades. Elkington introduces the emerging disciplines of zero impact design, engineering, and management through the personal experiences and reflections of the leading practitioners, putting us on a path to a zero impact economy: Zero Risk, Zero Emissions, Zero Pollution, and Waste, Zero Biodiversity Loss, and Zero Population Growth. Leading Zeronauts explain how they came to wake up to the challenges they speak about, the mistakes they have made along the way, and the lessons they have learned in the process, offering their advice on how we can get others to the same point in terms of thinking and action. From this, Elkington distills a concise set of rules for success. Concluding with recommendations for governments, investors, innovators, and educators, the book shares the lessons learned from scores of people worldwide who are helping define the scale of the challenges our species now faces and crucially, developing and deploying at scale some of the solutions that will provide the

Providing for National Security Andrew M. Dorman, Joyce P. Kaufman, 2014-04-30 Providing for National Security A Comparative Analysis argues that the provision of national security has changed in the 21st century as a result of a variety of different pressures and threats In this timely volume experts from both the academic and policy worlds present 13 different country case studies drawn from across the globe including established and newer states large and smaller states those on the rise and those in apparent decline to identify what these key players consider to be their national security priorities how they go about providing national security how they manage national security and what role they see for their armed forces now and in the future The book concludes that relative standing and the balance of power remains important to each state and that all see an important role for armed forces in the future *Headway*, 1919 *Pamphlet Foreign Policy Association*, 1927 The Nation, 1995-07 The Nation and Athenæum, 1923 **The New Age**, 1928 **The Herald of Asia**, 1919 The Contemporary Review, 1927 **Report of the Third International Congress of Women, Vienna, July 10-17, 1921** Women's International League for Peace and Freedom.
