Massimo Livi Bacci,2001 *Eli Heckscher, International Trade, and Economic History* Ronald Findlay,2006 The contributors first discuss Heckscher s efforts to forge the discipline of economic history by combining both the historian s careful evaluation of sources and the economist s rigorous models The Heckscher Ohlin theory of factor proportions is described and tested empirically Contributors then apply the theory to historical material including Mediterranean trade in Biblical times the economic effects of two periods of plague eight centuries apart and tariff policy in 35 countries from 1870 to 1938 Heckscher s masterly work on mercantilism the Continental Blockade and Swedish economic history is also described and appraised in light of recent historical research **BOOK JACKET** [A Short History of Economic Progress](#) Y.S. Brenner,2014-06-17 Y S Brenner is an economist whose main concern is with development and this attitude is reflected in his approach to economic history He begins this seminal study in the era of the Reformation in Europe and bases it on the hypothesis that once started economic progress will spread over ever increasing parts of the earth wherever and whenever conditions become suitable From this point of view he examines the nature of the impediments which prevent the more rapid and general progress of mankind towards greater material affluence while at the same time considering the positive growth promoting factors in the various economies Thus he provides an analysis of economic progress in the developed countries showing which natural social political and cultural forces promoted such progress and which delayed or hindered it He attempts to explain why European nations took several decades to emulate the achievements of Britain and why nations in other parts of the world such as Japan and Russia were unable for a considerable time to match the advances made in parts of Western Europe and the United States Finally he attempts to explain why the developing countries are still finding it so

difficult to catch up with the economic progress of the more advanced nations Y S Brenner was Head of the Department of Economics at Cape Coast University in Ghana The book arose from a series of lectures on economic development he delivered there during the years 1966 1967 This book was first published in 1969 **America: A Concise History, Volume One: To 1877** James A. Henretta, Rebecca Edwards, Robert O. Self, 2012-01-09 With fresh interpretations from two new authors wholly reconceived themes and a wealth of cutting edge scholarship the Fifth Edition of America A Concise History is designed to work perfectly with the way you teach the survey today Building on the book s hallmark strengths balance explanatory power and a brief yet comprehensive narrative as well as its outstanding full color visuals and built in primary sources authors James Henretta Rebecca Edwards and Robert Self have shaped America into the ideal brief book for the modern survey course at a value that can t be beat *The Great Dying* Maria Kelly, 2003 Between August and Christmas 1348 14 000 people are said to have died in Dublin from the plague a rate of 100 a day This horrendous disease spread rapidly and once infected its victims could die within three days Medieval Dubliners were no strangers to sudden illnesses diseases and early death However as the Black Death spread as the symptoms developed into skin eruptions hallucinations and haemorrhaging and above all as the death toll mounted the unprecedented nature of this disease was quickly recognised Maria Kelly examines the fear panic and superstition surrounding the outbreak that many believed was a punishment from God for their sins *Current Contents* ,1999 **Forthcoming Books** Rose Arny, 2001-06 *Ignoring the Apocalypse* David Howard Davis, 2007-06-30 Environmentalists often predict an Apocalypse is coming The earth will heat up like a greenhouse We will run out of energy Overpopulation will lead to starvation and war Nuclear winter will kill all plants and animals During the past fifty to one hundred years Americans have heard many prophecies of doom such as the Club of Rome report predicting the world economy would crash about the year 2020 These do not come as complete surprises without any warnings Sometimes the United States simply ignores the threats but other times it makes plans to prevent them This provocative book asks whether American planning is different for dangers that are truly apocalyptic ones that could end life on the planet or at least modern economic prosperity This provocative book begins by asking whether American planning is different for dangers that are truly apocalyptic ones that could end life on the planet or at least modern economic prosperity It goes on to ask why Americans ignore so many problems like the greenhouse effect or an oil shortage or nuclear war problems that have been forecast many times Then when the United States does plan why do those plans often go astray

The Growth of Humanity Barry Bogin, 2001-03-27 The Growth of Humanity is appropriate as an introduction for graduate students and advanced undergraduates studying human growth development and demography and is also appropriate for demographers anthropologists and human biologists **BOOK JACKET** **The British National Bibliography** Arthur James Wells, 2002 **World Economics** ,2005 **Subject Guide to Books in Print** ,1991 *Evolution and Human Behavior* ,2009 **Bulletin** ,2002 **The Subterranean Forest** Rolf Peter Sieferle, 2001 This work studies the

historical transition from the agrarian solar energy regime to the use of fossil energy which has fuelled the industrial transformation of the last 200 years The author argues that the analysis of historical energy systems provides an explanation for the basic patterns of different social formations It is the availability of free energy that defines the framework within which socio metabolic processes can take place This thesis explains why the industrial revolution started in Britain where coal was readily available and firewood already depleted or difficult to transport whereas Germany with its huge forests next to rivers was much longer dependent on a traditional solar energy regime Working Paper Series ,2001 **Experiments in Consilience** Frances Westley,Philip S. Miller,2003-11 The book describes the work of the Biodiversity Research Network a team of experts from the United States and Canada brought together to build interdisciplinary connections and stimulate an exchange of expertise Team members sought to understand the ecology and population dynamics of key species in particular ecosystems to understand the impact of human populations on those species and ecosystems and to develop tools and processes for involving a greater variety of stakeholders in conservation efforts
