Cole,2002-07-18 Environmental protection and resource conservation depend on the imposition of property rights broadly defined because in the absence of some property system private common or public resource degradation and depletion are inevitable But there is no universal first best property regime for environmental protection in this second best world Using case studies and examples taken from countries around the world this 2002 book demonstrates that the choice of ownership institution is contingent upon institutional technological and ecological circumstances that determine the differential costs of instituting implementing and maintaining alternative regimes Consequently environmental protection is likely to be more effective and more efficient in a society that relies on multiple and often mixed property regimes The book concludes with an assessment of the important contemporary issue of takings which arise when different property regimes collide      **Saving the Neighborhood** Richard R. W. Brooks,2013-04-01 *Saving the Neighborhood* tells the still controversial story of the rise and fall of racially restrictive covenants in America which bestowed an aura of legitimacy upon the wish of many white neighborhoods to exclude minorities It offers insight into the ways legal and social norms reinforce one another to codify and perpetuate intolerance      **The Oxford Companion to American Law** Kermit L.
