Single-system Designs in the Social Services Martin Bloom, 1993 This new book explores basic issues in the use of single system designs by practitioners in field settings *Single System Designs in the Social Services* addresses current methodological and practice issues involving single system designs SSDs It reviews the history of SSDs and discusses future issues and options in the evaluation of practice in social service settings using SSDs The book provides an intellectual frame of reference to understand the place of SSDs in contemporary social work practice and examines the application of SSDs to nonbehavioral methods of practice the use of SSDs in family practice the connection of SSDs and computers and criticism and response regarding SSDs While single system designs are easy to use in many kinds of client situations their use also raises many important issues Chapters in this book address such issues and provide tentative suggestions to resolve them by answering such questions as What are the ethical principles for using single system designs with clients How can the parallel revolution in high technology be connected to single system designs Do graduates

of schools of social work actually use these methods after graduation Are there practical short cuts to using these modes of evaluation How applicable are single system designs to non behaviorally oriented practitioners How can single system designs be applied to families Social work educators are mandated by their accrediting organizations to teach students to evaluate their own practice This book addresses the tough issues in fulfilling that mandate through instruction in single system designs discussing topics often not covered in depth by textbooks Social work practitioners researchers and educators in applied social science such as social work and clinical psychology will find this a valuable book to help them sort out the myriad issues surrounding the use of single system designs

The Future of Social Work Jason W. Duffield, 2021

The Covid 19 pandemic of 2020 was a transformative event that changed the way many of us work with many people using online platforms to work remotely often for the first time The field of social work was no exception The problem with this online shift lies in the nature of the social work profession human connection empathy and face to face relationships are an integral part of how social workers perform their jobs This study aimed to explore how social workers adapted to the online environment what worked well for them and what could be improved The research used an approach that was a blend of traditional design Co Design and Appreciative Inquiry to work with faculty staff current students and alumni of The Ohio State University College of Social Work regarding their response to the pandemic The study consisted of a survey interviews and interactive online workshops using Zoom a videoconferencing platform and Miro a collaborative platform and online whiteboard These activities were then summarized in an interactive presentation that provided an additional opportunity for collaboration with social work stakeholders The output of this study includes the design of a prototype for a model that can assist social workers who are involved in micro clinical work when working with clients online There is an associated matrix that includes the types of barriers social workers are likely to encounter when working with clients online things such as a lack of internet or a chaotic home environment The matrix also includes a sampling of means to address these barriers both from real world examples that were relayed to me by social workers and new ideas that were generated during an online workshop with social work stakeholders It is my hope that social workers can use both the online treatment model and the barriers matrix as resources to assist with their online interactions and to continue to develop and evolve both items through their practice While these resources are focused on micro social work practice some of the findings in this document may be of interest to anyone who is participating in an online work environment

Quasi-Experimental Research Designs Bruce A. Thyer, 2012-02-02 It is usually the case that ethical and pragmatic considerations preclude the use of randomly assigning social work clients to experimental and comparative treatment conditions In such instances the practicality of employing a quasi experimental method becomes an excellent alternative Quasi experimental research designs allow researchers to compare groups and the use of increasingly sophisticated programs provides greater statistical control for what has become the most widely employed research approach used to evaluate the outcomes of social work programs and policies This pocket

guide describes the logic design and conduct of the range of such designs encompassing pre experiments quasi experiments making use of a control or comparison group and time series designs An introductory chapter describes the valuable role these types of studies have played in social work from the 1930s to the present Subsequent chapters delve into each design type s major features the kinds of questions it is capable of answering and its strengths and limitations By linking the theoretical discussion of quasi experimental designs with actual applications in social work literature the usefulness and vitality of these research methods comes alive for readers While this book can be utilized as a manual it will also have great value for practitioners seeking a greater conceptual understanding of quasi experimental studies in social work literature Human service professionals planning to undertake a program evaluation of their agency s services will find this book helpful in understanding the steps and actions needed to adopt a quasi experimental strategy

Social Work Practice in the Criminal Justice System George T. Patterson,2013-07-03 The criminal justice system with its complex policies and procedures and its focus on deterrence punishment and rehabilitation can be a difficult system to understand *Social Work Practice in the Criminal Justice System* presents an overview of the criminal justice system exploring the network of systems which comprise it Integrating social work values and a commitment to social justice this textbook explores how social workers can practice to address social problems within the criminal justice system and promotes the development of knowledge skills and critical reflection in this increasingly important area of practice In addition to covering the four key areas for social work practice law enforcement courts corrections and legislation it covers Alternative programs and services Special populations such as juveniles women and sex offenders Special topics such as reoffending wrongful conviction and racial disparities The application of evidence based practice principles in criminal justice Looking at the challenges and opportunities of social work practice in the criminal justice system this is the ideal text for social work instructors students and practitioners working with or within the criminal justice system Each chapter includes a summary of social work practice implications key terms and suggested further reading
