A Fait Accompli

M Mosston

A Fait Accompli:

China, Faits Accomplis and the Contest for East Asia Joshua Haste, 2023-04-28 This book explores China's use of faits accomplis in its periphery and offers the first formal model for the use of faits accomplis by rising powers. With growing attention to great power competition and conflict in the gray zone between war and peace, this book explains China's use of faits accomplis to revise the maritime status quo in the South and East China Seas. Using formal modelling and case study analysis, the book argues that while power shifts provide rising states with opportunities to impose faits accomplis to revise the status quo, the use of faits accomplis also increases the likelihood of war with the dominant state. The book surveys existing understandings of how power shifts incentivize interstate competition in general and in the case of Sino-American competition in particular, and brings existing theory and novel modelling to explain China's differing strategies in the South and East China Seas in the first two decades of the 21st century. The book concludes by using the lessons from these cases to assess the strategic options available to both states and conditions that make a peaceful resolution more likely. This book will be of much interest to students of Chinese politics, Asian security studies, and International Relations. **Cleared for Love**

G. Scott Graham, 2025-07-31 Why do so many relationships stall out even when both people want to make it work? Because love alone isn't enough. What matters most is how you navigate it. *Cleared for Love* is a relationship book for people who are ready to stop defaulting to conflict, compromise, or quiet resentment and start co-piloting their relationship with intention. Blending honest storytelling with practical tools, it reads like a hybrid between a narrative guide and a relationship workbook. You'll learn how to shift from reacting to collaborating, not just in major decisions but as co-pilots in the everyday choices that shape connection and trust. Inside, you'll discover the four patterns couples fall into and why only one builds long-term partnership. How to recognize when you're slipping into power plays, passive decisions, or one-sided effort. What real collaboration looks like and how to practice it, even when emotions run high. Simple habits that turn planning, intimacy, and everyday communication into shared success. How to recover quickly when you lose sync and return to partnership without blame. For readers who want deeper practice, a companion workbook is available for purchase, packed with additional prompts, guided exercises, and real-life scenarios for solo reflection or couples work. Whether you're starting fresh or strengthening something already good, this book gives you the mindset and tools to fly your relationship with confidence, care, and courage.

Causes of War Stephen Van Evera, 1999 What causes war? How can military conflicts best be prevented? A prominent political scientist here addresses these questions, offering ideas that will be widely debated. Van Evera's book demonstrates that ideas from the Realist paradigm can offer strong explanations for international conflict and valuable prescriptions for its control. **Congressional Record** United States.
