## Artists Drawing:

**Drawing Investigations** Sarah Casey, Gerry Davies, 2020-06-11 Using close visual analysis of drawings artist interviews critical analysis and exegesis Drawing Investigations examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed How does drawing add shape to ideas How does the artist accommodate to challenges and restraints of a particular environment To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments Drawing Investigations evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world urban environment social forces and lived experience Examples represent a spectrum of research in international contexts an oceanographic Institute in California the archives of Amsterdam s Rijksmuseum the Antarctic Survey geothermal research in Japan and the Kurdish diaspora in Iraq Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents By exploring drawing s capacity to capture and describe experience to sharpen visual faculties and to bridge embodied and conceptual knowledge Drawing Investigations offers a fresh critical perspective on contemporary drawing practice

*Drawing Thought* Andrea Kantrowitz, 2022-10-11 Drawing as a tool of thought an investigation of drawing cognition and creativity that integrates text and hand drawn images Drawing is a way of constructing ideas and observations as much as it is a means of expressing them When we are not ready or able to put our thoughts into words we can sometimes put them down in arrangements of lines and marks Artists designers architects and others draw to generate explore and test perceptions and mental models In *Drawing Thought* artist educator Andrea Kantrowitz invites readers to use drawing to extend and reflect on their own thought processes She interweaves illuminating hand drawn images with text integrating recent findings in cognitive psychology and neuroscience with accounts of her own artistic and teaching practices The practice of drawing seems to be found across almost all known human cultures with its past stretching back into the caves of prehistory It takes advantage of the ways in which human cognition is embodied and situated in relationship to the environments in which we find ourselves We become more aware of the interplay between our external surroundings and the inner workings of our minds as we draw We can trace moments of perception and understanding in a sketchbook that might otherwise be lost and go back to reexamine and revise those traces later Kantrowitz encourages readers to draw out their own ideas and observations through a series of guided exercises and experiments with her lively drawings and engaging text pointing the way Drawing is a tool for thought in anyone s hands it is creativity in action *Catalogue of Drawings by British Artists and Artists of Foreign Origin Working in Great Britain ...: S-Z* British Museum.
