Artwise Venice:

Map Link Catalog, 2008 **Natural Perception** Alice Palmer, 2023-09-14 Images of nature abound in the practice of international environmental law but their significance in law is unclear Drawing on visual jurisprudence and interpretative methods for visual art this book analyses photographs for their representations of nature s aesthetic value in treaty processes that concern world heritage whales and biodiversity It argues that visual images should be embraced in the prosaic practice of international law particularly for treaties that demand judgements of nature s aesthetic value This environmental value is in practice conflated with natural beauty ethical and cultural values and displaced by economic and scientific values Interpretations of visual images can serve instead to critique and conceive sensory imaginative and emotional appreciations of nature from different cultural perspectives as proposed by philosophers of environmental aesthetics Addressing questions of value and the visual this landmark book shows how images can be engaged by nations to better protect the environment under international law

Soft Living Architecture Rachel Armstrong, 2018-09-06 Soft Living Architecture explores the invention of new architectures based on living processes It crafts a unique intersection between two fast developing disciplines biomimicry and biodesign in architecture and bioinformatics and natural computing in the natural sciences This is the first book to examine both the theory and methodology of architecture and design working directly with the natural world It explores a range of approaches from the use of life like systems in building design to the employment of actual growing and living cell and tissue cultures as architectural materials creating architecture that can change learn and grow with us The use of living architecture is cutting edge and speculative yet it is also inspiring a growing number of designers worldwide to adopt alternative perspectives on sustainability and environmental design The book examines the ethical and theoretical issues arising alongside case studies of experimental practice to explore what we mean by natural in the Anthropocene and raise deep questions about the nature of design and the design of nature This provocative and at times controversial book shows why it will become ever more necessary to embrace living processes in architecture if we are to thrive in a sustainable future
