Murphy,1970      **Downriver** Dean Krakel (II),1987 The history of the Yellowstone River and Yellowstone River Valley blending descriptions of contemporary travel with tales of historical events      *Rolling Back the River* Paul Guernsey,2026-02-17 Rolling Back the River is a lyrical and unflinching journey through wild streams wild hearts and the wilderness of loss With humor heart and hard earned wisdom Paul Guernsey reminds us that the rivers we love and the lives we build can never flow backward Joshua Caldwell fly fisher director of the feature film Mending the Line While fly fishing on a remote river in southern Argentina a veteran outdoor writer from Maine finds himself swept into a cascade of bizarre events all connected to an enigmatic billionaire environmentalist and his cosmopolitan twin nieces Vincent Mapp former adventure traveling editor in chief for an international fly fishing magazine now leads a life centered around teaching at a small Maine environmental college and obsessively fishing his home waters for just about anything that swims But after his wife of many years abruptly upends his world by ditching him for someone who doesn't fish all the time Vincent decides to accept one last far flung assignment as a fly fishing journalist and he heads off to Patagonia with the goal of catching some of the few remaining fast disappearing Argentinian landlocked salmon all of which are descended from fish originally introduced to Argentina from Maine Even at the literal end of the earth however and exploring an enchanted landscape of devastating beauty Vincent finds himself unable to avoid conflict He arrives at an isolated ranch on the Perca River just as a mysterious predator has begun attacking pets and livestock and it's not long before he experiences his own terrifying nighttime run in with the creature He also discovers that the reclusive American owner of an adjacent ranch multi billionaire wildlife conservationist and avid fly angler J T Allman has been commissioning some unsettling environmental experiments on his vast property One serious complication in Vincent's attempts to get to the bottom of all the strangeness Allman holds a simmering 20 year old grudge against him for events connected to his time as a magazine editor Turbulent waters become increasingly treacherous after Allman's cultured equestrian and attractive twin nieces unaware of their elderly uncle's animosity toward Vincent invite him to a bizarre festival on the grounds of the Allman estate Through it all Vincent and his faithful fishing guide Sancho Nelson try very hard to catch some salmon      *Inland Fisheries* ,2008-04-15 The current high demand for fish and increased awareness of the role of the environment in supporting human well being has led to a situation where attitudes to inland water resources are changing rapidly Trends in resource use and environmental impact are very

evident in inland waters which are particularly vulnerable as they act as collectors of all the activities occurring in their basins and rank as some of the most endangered ecosystems in the world The principle changes influencing the evolution of the aquatic resource for fisheries are described in this book which has been compiled for the Food and Agriculture Organization of the United Nations Canoe on the Nahanni DH Koester,2015-01-15 The setting is the legendary South Nahanni River in Canada s Northwest Territories as remote and wild a river as any man could hope for The Nahanni flows through a land of unsurpassed beauty and legend harrowing legend To access it you must travel due North across the North American continent until the road is no more then jump a bush plane for a flight across the infamous Mackenzie Mountains deep into the wild to the headwaters of the Nahanni Once in there is but one way out down 300 miles of rampaging river across mighty Virginia Falls through Deadmen s Valley then a succession of three formidable bottomless canyons filled wall to wall with treacherous rapids enough whitewater and danger to satisfy even the most beastly of men On that river in the summer of 74 a man a boy and an open 16 foot wood and canvass canoe with 250 miles of bad water between them and homeward bound Fate would not be kind and near the end of the journey they would find themselves hopelessly trapped in the Lower Canyon without gear or canoe Only the most unlikely of events could save them but could they survive long enough for it to happen **Natural States** Richard W. Judd,2010-09-30 Richard Judd and Christopher Beach define the environmental imagination as the attempt to secure a sense of freedom permanence and authenticity through communion with nature The desire for this connection is based on ideals about nature wilderness and the livable landscape that are personal variable and often contradictory Judd and Beach are interested in the public expression of these ideals in post World War II environmental politics Arguing that the best way to study the relationship between popular values and politics is through local and regional records they focus on Maine and Oregon states both rich in natural beauty and environmentalist traditions but distinct in their postwar economic growth Natural States reconstructs the environmental imagination from public commentary legislative records and other documents Judd and Beach trace important divisions within the environmental movement noting that they were balanced by a consistent civic minded vision of environmental goods shared by all They demonstrate how tensions from competing ideals sustained the movement contributed to its successes but also limited its achievements In the process they offer insight into the character of the broader environmental movement as it emerged from the interplay of local state and national politics The study ends in the 1970s when spectacular legislative achievements at the national level were masking a decline in mainstream civic engagement in state politics The authors note the rise of the private ecotopia and the increasing complexity in the way Americans viewed their connections with the natural world Yet today despite wide variations in beliefs and lifestyles a majority of Americans still consider themselves to be environmentalists In Natural States environmental politics emerges less as a conflict between people who do and do not value nature and more as a debate about the way people define and then chose to live with nature In their attempt to place

the passion for nature within a changing political and cultural context Judd and Beach shed light on the ways that ideals unify and divide the environmental movement and act as the source of its enduring popularity *Down River* Richard Anderson,1950 Wiyot Handbook I Karl V.
