Legal Tech and the New Sharing Economy Marcelo Corrales Compagnucci, Nikolaus Forgó, Toshiyuki Kono, Shinto Teramoto, Erik P.M. Vermeulen, 2019-12-13 The exponential growth of disruptive technology is changing our world The development of cloud computing big data the internet of things artificial intelligence machine learning deep learning and other related autonomous systems such as self driving vehicles have triggered the emergence of new products and services These significant technological breakthroughs have opened the door to new economic models such as the sharing and platform based economy As a result companies are becoming increasingly data and algorithm driven coming to be more like decentralized platforms New transaction or payment methods

such as Bitcoin and Ethereum based on trust building systems using Blockchain smart contracts and other distributed ledger technology also constitute an essential part of this new economic model The sharing economy and digital platforms also include the everyday exchange of goods allowing individuals to commodify their surplus resources Information and innovation technologies are used in order to then match these resources with existing demand in the market Online platforms such as Airbnb Uber and Amazon reduce information asymmetry increase the value of unused resources and create new opportunities for collaboration and innovation Moreover the sharing economy is playing a major role in the transition from exclusive ownership of personal assets toward access based exploitation of resources The success of online matching platforms depends not only on the reduction of search costs but also on the trustworthiness of platform operators From a legal perspective the uncertainties triggered by the emergence of a new digital reality are particularly urgent How should these tendencies be reflected in legal systems in each jurisdiction This book collects a series of contributions by leading scholars in the newly emerging fields of sharing economy and Legal Tech The aim of the book is to enrich legal debates on the social economic and political meaning of these cutting edge technologies The chapters presented in this edition attempt to answer some of these lingering questions from the perspective of diverse legal backgrounds
