Energy Poverty Antoine Halff,Benjamin K. Sovacool,Jon Rozhon,2014-11-27 This edited volume looks at energy poverty an issue whose pivotal role in the fight for human development is only now being

recognised by policymakers Nearly one quarter of humanity still lacks access to electricity Close to one third rely on traditional fuels like firewood and cow dung for cooking at great cost to their health and welfare While most prevalent in parts of Africa and Asia energy poverty is a global problem which concerns us all This book which brings together economists policymakers entrepreneurs and other practitioners from all over the world is dedicated to a single goal finding a solution to this haunting problem It is part history part economics part political analysis part business case review and part field handbook Part One focuses on defining and measuring the problem and benchmarking progress in solving it an obvious prerequisite to any successful energy access policy Part Two reviews past and current energy access programs with an eye towards finding out what worked and what didn't and what can be replicated elsewhere These case reviews are told as seen on the ground China's experience by top Chinese officials and Africa's by African regulators and scholars Based in part on those cases the book's last more forward looking section aims to present practitioners with a tool kit a menu of options to speed up their efforts The energy access agenda is gaining traction at a time of rising concerns about climate change and resource constraints This book shows that bringing modern energy to those who lack it not just a moral imperative but will likely benefit the world as a whole without harming the environment or unduly stretching finite resources

Critical Applied Linguistics Alastair Pennycook, 2021-06-28 Now in its second edition this accessible guide and introduction to critical applied linguistics provides a clear overview of the problems debates and competing views in language education literacy discourse analysis language in the workplace translation and other language related domains Covering both critical theory and domains of practice the book is organized around five themes the politics of knowledge the politics of language the politics of difference the politics of texts and the politics of pedagogy Recognizing that a changing world requires new ways of thinking and that many approaches have watered down over time the new edition applies a sharp fresh look at established and new intellectual frameworks The second edition is comprehensively updated with additional research throughout and features new discussions of colonialism queer theory race and gender translanguaging and posthumanism With a critical focus on the role of applied linguists Pennycook emphasizes the importance of a situated collaborative perspective that takes the discussion away from questions of implementation and insists instead that critical applied linguistics has to be an emergent program from the contexts in which it works This landmark text is essential reading for students and researchers of applied linguistics multilingualism language and education TESOL and language and identity
