Interaction and the Standardized Survey Interview Hanneke Houtkoop-Steenstra,2000-08-03 This study investigates in detail the interaction between interviewers and respondents in standardised social survey interviews Applying the techniques of conversation analysis Hanneke Houtkoop Steenstra reveals how certain rules of normal conversation fail to apply in interviews based on a standard questionnaire and offers original empirical evidence to show what really happens Her book demonstrates that interview results can only be understood as products of the contingencies of the interview situation and not as is usually assumed the unmediated expressions of respondents real opinions Her conclusions have important implications for anyone interested in effective survey compilation and interpretation The book is highly accessible setting out the basic tools of conversation analysis simply and clearly and suggesting ways of improving questionnaire design wherever possible Its approach will be of great interest to students and researchers of survey methodology

Handbook of Interview Research Jaber F. Gubrium,James A. Holstein,2002 The Handbook of Interview Research is the most ambitious attempt yet at examining the place of the interview in contemporary society Interviewing is the predominant mode of research in the social sciences It s also the stock in trade of information seekers in organizations and institutions of all kinds as well as in the mass media Across the board interviews provide today s leading window on the world of experience The Handbook offers a comprehensive examination of the interview at the cutting edge of information technology Drawing upon leading experts from a wide range of professional disciplines this book addresses conceptual and technical challenges that confront both academic researchers and interviewers with more applied goals From interview theory to the nuts and
