

# EARLY INTERVENTION

An early start to improve your child's development

A child with developmental delay can progress better by starting therapies early

## WHY INTERVENE EARLY?

Child's brain is most capable of change and adaptation during this age

The first three years of a child's development are the most crucial

**Pediatrician** provides medical care to infants, children and adolescents.

**Psychologist** analyzes and addresses emotional & behavioral challenges in a child.

**A Speech therapist** works to improve a child's speech, language and communication.

**Special educators** shape a child's thinking, learning skills and social interactions.

**Physiotherapist** helps build muscle strength & improve motor development.

**Occupational therapist** helps develop hand function & skills required for daily living.

*"An early intervention team is a multidisciplinary team of therapists, with the parents playing a central role in its operations."*

The success of any intervention depends a lot on the family's involvement.

You must insist on being involved

You must encourage your child's therapists to work together.
