Principles of Ecosystem Stewardship F Stuart Chapin III, Gary P. Kofinas, Carl Folke, 2009-06-12 The world is undergoing unprecedented changes in many of the factors that determine its fundamental properties and their influence on society These changes include climate the chemical composition of the atmosphere the demands of a growing human population for food and fiber and the mobility of organisms industrial products cultural perspectives and information flows The magnitude and widespread nature of these changes pose serious challenges in managing the ecosystem services on which society depends Moreover many of these changes are strongly influenced by human activities so future patterns of change will continue to be influenced by society's choices and governance The purpose of this book is to provide a new framework for natural resource management a framework based on stewardship of ecosystems for human well being in a world dominated by uncertainty and change The goal of ecosystem stewardship is to respond to and shape change in social ecological systems in order to sustain the supply and opportunities for use of ecosystem services by society The book links recent advances in the theory of resilience sustainability and vulnerability with practical issues of ecosystem management and governance The book is aimed at advanced undergraduates and beginning graduate students of natural resource management as well as professional managers community leaders and policy makers with backgrounds in a wide array of disciplines including ecology policy studies economics sociology and anthropology

Fisher,Erika S. Svendsen,James Connolly,2015-02-11 Once considered the antithesis of a verdant and vibrant ecosystem cities are now being hailed as highly efficient and complex social ecological systems Emerging from the streets of the post industrial city are well tended community gardens rooftop farms and other viable habitats capable of supporting native flora and fauna At the forefront of this transformation are the citizens living in the cities themselves As people around the world increasingly relocate to urban areas this book discusses how they engage in urban stewardship and what civic participation in the environment means for democracy Drawing on data collected through a two year study of volunteer stewards who planted trees as part of the MillionTreesNYC initiative in the United States this book examines how projects like this can make a difference to the social fabric of a city It analyses quantitative survey data along with qualitative interview data that enables the volunteers to share their personal stories and motivations for participating revealing the strong link between environmental stewardship and civic engagement As city governments in developed countries are investing more and more in green infrastructure campaigns to change the urban landscape this book sheds light on the social importance of these initiatives and shows how individuals efforts to reshape their cities serve to strengthen democracy It draws out lessons that are highly applicable to global cities and policies on sustainability and civic engagement What is Urban Environmental Stewardship? Michele Romolini,2012 Constructing a framework to convey the layered meanings of stewardship will help to focus and guide future research A cognitive mapping technique was used to elicit responses to the question What is environmental stewardship Semistructured interviews were conducted with representatives of nine Seattle environmental organizations a group of practitioners who collectively represent over 100 years of experience in the field Program planners and managers have particularly direct experiences of stewardship Cognitive mapping enables participants to explore then display their particular knowledge and perceptions about an idea or activity Analysis generated thematic structural representations of shared concepts Results show that the practitioners have multilayered perceptions of stewardship from environmental improvement to community building and from actions to outcomes *Ecological Stewardship* Robert C. Stewardship F Stuart Chapin III,2020-06-03 In a society more concerned with how to cope with existential dread than how to make actionable changes to save the planet a surprisingly large number of Americans identify as environmentalists What can individual people do to lessen human impacts on the planet This is not an easy question Most research is focused on large scale changes that go beyond anything an individual can accomplish and people are left feeling defeated rather than inspired to make changes in their everyday lives Change starts at home and F Stuart Chapin III has assembled a book for people who want to learn more about global changes and more importantly what they can do about them starting today Grassroots Stewardship approaches our current situation with an educated sense of hope and positivity This book emphasizes actions by individuals rather than governmental or corporate institutions to trigger transformational change Readers will learn what they can do to most significantly transform their communities and the planet with more sustainable pathways

into dialogue with current scientific findings and commitments **A Green and Permanent Land** Randal S. Beeman, James

A. Pritchard, 2001 Once patronized primarily by the counterculture and the health food establishment the organic food

industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public

awareness of ecological issues Assumed by many to be a recent phenomenon that industry owes much to agricultural

innovations that go back to the Dust Bowl era This book explores the roots and branches of alternative agricultural ideas in

twentieth century America showing how ecological thought has challenged and changed agricultural theory practice and

policy from the 1930s to the present It introduces us to the people and institutions who forged alternatives to industrialized

agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a

strong advocacy of economic justice for farmers Randal Beeman and James Pritchard show that agricultural issues were

central to the rise of the environmental movement in the United States As family farms failed during the Depression a new

kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology

influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning

comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these

ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to

farming In chronicling the overlooked history of alternative agriculture *A Green and Permanent Land* records the significant

contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott

and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by

demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically

altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers

considerable food for thought
