The Gender of Death Karl S. Guthke, 1999 Why is it that in some cultures and times literature folklore and art commonly represent death as a man in others as a woman Karl S Guthke shows that these choices which often contradict the grammatical gender of the word death in the language concerned are neither arbitrary nor accidental In earlier centuries the gender of the figure of death contributed to the interpretation of biblical narrative in particular whether the original sin was that of Adam or Eve and also reflected the importance of the classical figure of Thanatos More recently the gender of death as angel lover or bride whether terrifying or welcome has carried powerful psychological and social connotations Tracing the gender of representations of death in art and literature from medieval times to the present day Guthke offers astonishing new insights into the nature and perception of the Western self in its cultural intellectual and literary context
