## **Death Planet:**

**The Life and Death of Planet Earth** Peter D. Ward, Donald Brownlee, 2003 Planet Earth is middle aged Science has worked hard to piece together the story of the evolution of our world up to this point but only recently have we developed the understanding and the tools to describe the entire life cycle of a planet Ward and Brownlee a geologist and an astronomer respectively combine their knowledge of how the critical sustaining systems of our planet evolve through time with their understanding of the life cycles of stars and solar systems to tell the story of the second half of Earth's life The process of evolution will essentially reverse itself life as we know it will subside until only the simplest forms remain Eventually they too will disappear The oceans will evaporate the atmosphere will degrade and as the sun slowly expands Earth itself will eventually meet a fiery end From publisher description

**The Existence** Theodore Ihejieta, 2018-12-21 The Existence By Theodore Ihejieta The Existence is a book of love and life that talks about the world as the existence of human beings and tells human beings to understand that the world is the love and the life It is a book of Planet Earth which the Planet Earth gave to the author because the author asked the Planet Earth for the book of the world The author is a human being who lost faith in God and called on Planet Earth to do work and save human beings from evil and death in the world This is a book of a human being who was challenged by evil and death in the world and the human being called on his existence for help and protection The author did not like to die in the world and told his existence that he did not want to die because the author believed that Planet Earth has the power to save human beings in the world The Existence is the faith the hope and the charity that God challenged human beings to find and tell the mountain of evil and death to move away from human beings

**The Maybe Universe** J. H. Hacsí, 2002-08-07 Modern science has placed before us a vast and ancient universe one said to contain a billion trillion stars clustered in a hundred billion galaxies and to be thirteen billion years old Our earthly home we are told is a tiny chunk of matter randomly formed revolving around a mediocre star in the outlying reaches of an unspectacular galaxy Life on earth developed by chance We are the end result of a series of accidents This scientific Story of Creation though finely detailed isn't based on cold hard fact Scientists proclaim without a shred of proof that the laws of nature remain constant through both time and space Upon this rock they build their world This scientific premise cannot be proved It must be taken on faith This book dismisses the scientific premise and explains the universe based on an equally unprovable premise That we are created in the image of our creator and create the material world in our image It then sets out to prove that the universe is not a vast ancient place ruled by chance but rather exists as a reflection or shadow or mirror image of us **The Chautauquan**, 1896 **Reincarnation** Richard Ingalese, 1928 The Door of Death Wide Open Jules Guyard, 1925 Lucifer, 1891 **The Nation**, 1910 **The Bṛihajâtakam of Varâha Mihira** Varâhamihira, 1912
