## **Bus Driver Numeracy And Literacy Test:**

*Driver Behaviour and Training* Dr Lisa Dorn,2012-10-01 Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour The objective of the *Driver Behaviour and Training* volumes and of the conference on which they are based is to describe and discuss recent advances in the study of this important area It bridges the gap between practitioners in road safety and theoreticians investigating driving behaviour from a number of different perspectives and related disciplines Educating drivers to be safe for life means a shift in focus from simply developing vehicle handling skills towards ensuring that drivers are aware of how goals and motivations can influence decision making throughout their driving career A major focus within this fourth volume is to consider how driver training needs to be adapted in order to raise awareness of how human factors contribute to unsafe driving behaviour From this it goes on to promote the development of driver education that considers all the skills that are essential for road safety The readership will include road safety researchers from a variety of different academic backgrounds senior practitioners in the field of driver training from regulatory authorities and professional driver training organisations such as the police service and private and public sector personnel
