**Catholic Churchmen in Science. (Second Series)** James Joseph Walsh,1909 *Catholic Churchmen in Science*  
James Joseph Walsh,1969 **Catholic Churchmen in Science** James J. Walsh,2007-03 PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is depend ent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing **Catholic Churchmen in Science. **Catholic Churchmen in Science** James Walsh,2017-12-31 The following sketches of the lives of clergymen who were great scientists have appeared at various times during the past five years in Catholic magazines They were written because the materials for them had gradually accumulated during the preparation of various courses of lectures and it seemed advisable to put them in order in such a way that they might be helpful to others working along similar lines They all range themselves naturally around the central idea that the submission of the human reason to Christian belief and of the mind and heart to the authority of the Church is quite compatible with original thinking of the highest order and with that absolute freedom of investigation into physical science which has only too often been said to be quite impossible to churchmen For this reason friends have suggested that they should be published together in a form in which they would be more easy of consultation than when scattered in different periodicals It was urged too that they would thus also be more effective for the cause which they uphold This friendly suggestion has been yielded to whether justifiably or not the reader must decide for himself There is so great a flood of books good bad and indifferent ascribing their existence to the advice of well meaning friends that we poor authors are evidently not in a position to judge for ourselves of the merit of our works or of the possible interest they may arouse I have to thank the editors of the American Catholic Quarterly Review of the Ave Maria and of The Ecclesiastical Review and The Dolphin for their kind permission to republish the articles which appeared originally in their pages All of them though substantially remaining the same have been revised modified in a number of particulars and added to very considerably in most cases The call for a second edition the third thousand of this little book is gratifying Its sale encouraged the preparation of a Second Series of CATHOLIC CHURCHMEN IN SCIENCE and now the continued demand suggests a Third Series which will be issued during the year Some minor corrections have been made in this edition but the book is substantially the same

James Joseph Walsh, 1911     *MAKERS OF ELECTRICITY* Brother Potamian, James Joseph Walsh, 2024-02-12 The ancients  
laid down the laws of literary form in prose as well as in verse and bequeathed to posterity works which still serve as models  
of excellence Their poets and historians continue to be read for the sake of the narrative and beauty of the style their  
philosophers for breadth and depth of thought and their orators for judicious analysis and impassioned eloquence In the  
exact sciences too the ancients were conspicuous leaders by reason of the number and magnitude of the discoveries which  
they made You have only to think of Euclid and his Elements of Apollonius and his Conics of Eratosthenes and his  
determination of the earth's circumference of Archimedes and his mensuration of the sphere and of the inscription on Plato's  
Academy Let none ignorant of geometry enter my door to realize the fondness of the Greek mind for abstract truth and its  
suppleness and ingenuity in mathematical investigation But the sciences of observation did not advance with equal pace nor  
was this to be expected as time is an essential element in experimentation and in the collection of data both of which are  
necessary for the framing of theories in explanation of natural phenomena     **Makers of Electricity** Michael Francis
