Cattle Deforestation And Development In The Amazon:

Cattle, Deforestation, and Development in the Amazon M. D. Faminow, 1998 The large scale destruction of tropical rain forests and the consequences of the loss of their rich complex ecosystems is one of the most well publicised globally important environmental issues of the late twentieth century The bulk of the remaining forest is to be found in the Amazon Basin largely in Brazil and the rapid expansion of cattle ranching has been implicated as the main cause of irreversible deforestation in this part of South America over the last decade This book brings together and critically assesses the economic agronomic and environmental evidence for the benefits and costs of cattle ranching in the Amazon region The ecology of the Amazon rain forest is described along with methods of economic valuation of forests agricultural systems in the Amazon the history and underlying causes of its colonisation and the effects on land use and the extent of deforestation This leads on to a more detailed description of the cattle ranching systems employed in the Amazon their economics and effects on the forest In conclusion the potential for sustainable cattle production in the Amazon is discussed The product of considerable field research in Brazil by the author this book presents a positive perspective on a highly controversial topic in a uniquely systematic way and with far reaching implications It is an essential purchase for livestock economists agronomists foresters and environmentalists with an interest in South American and other tropical regions It will also be a valuable source for advanced students of agronomy animal science agricultural economics and ecology

Political Ecologies of Meat Jody Emel, Harvey Neo, 2015-05-15 Livestock production worldwide is increasing rapidly in part due to economic growth and demand for meat in industrializing countries Yet there are many concerns about the sustainability of increased meat production and consumption from perspectives including human health animal welfare climate change and environmental pollution This book tackles the key issues of contemporary meat production and consumption through a lens of political ecology which emphasizes the power relations producing particular social economic and cultural interactions with non human nature Three main topics are addressed the political ecology of global livestock production trends changes in production systems around the world and their implications for environmental justice and existing and emerging governance strategies for meat production and consumption systems and their implications Case studies of different systems at varying scales are included drawn from Asia Africa the Americas and Europe The book includes an editorial introduction to set the context and synthesize key messages for the reader

Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil s position in an evolving capitalist world economy It is shown how Brazil s effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia The author analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro development groups within Brazil claim that such organizations threaten Brazil s sovereignty over its own resources

Handbook of Forest Resource Economics Shashi Kant, Janaki Alavalapati, 2014-04-03 It is increasingly recognized that the economic value of forests is not merely the production of timber Forests provide other key ecosystem services such as being sinks for greenhouse gases hotspots of biodiversity tourism and recreation They are also vitally important in preventing soil erosion and controlling water supplies as well as providing non timber forest products and supporting the livelihoods of many local people This handbook provides a detailed comprehensive and broad coverage of forest economics including traditional forest economics of timber production economics of environmental role of forests and recent developments in forest economics The chapters are grouped into six parts fundamental topics in forest resource economics economics of forest ecosystems economics of forests climate change and bioenergy economics of risk uncertainty and natural disturbances economics of forest property rights and certification and emerging issues and developments Written by leading environmental forest and natural resource economists the book represents a definitive reference volume for students of economics environment forestry and natural resource economics and management

Biodiversity and Conservation: Causes and consequences of biodiversity loss 2 : pollution, climate change and unsustainable exploitation Richard J. Ladle, 2009

Although biodiversity is a relatively new coinage scientists have been studying the subject it describes long before the word s first appearance in the language in the mid 1980s In 1973 for instance the UK Systematics Association held a symposium on The Changing Flora and Fauna of Britain which concluded that not enough attention was being paid to the conservation of rarities a conclusion also reached said the symposium at a meeting of the Linnaean Society some forty years earlier By 1980 the Global 2000 Report to the President published by the US Council on Environmental Quality starkly warned of a diminution of up to one fifth of all species by the turn of the century and there is now a growing consensus that the world faces a biodiversity crisis a potentially catastrophic global loss of genetic ecosystem and most obviously species diversity Indeed especially since the UN Convention on Biological Diversity was promulgated in Rio de Janeiro in 1992 conserving biodiversity has become the principal focus of the global conservation movement Indeed the study of the origins maintenance and protection of diversity has become perhaps the most vibrant offshoot of ecology and conservation studies It is increasingly taught and studied in universities and other research institutions around the world Addressing the need for an authoritative reference work to make sense of this rapidly growing subject and its ever more complex and multidisciplinary corpus of scholarly literature Biodiversity and Conservation is a new title in the Routledge series Critical Concepts in the

Gains from Keeping Cattle on Fallow-based Smallholdings in the Eastern Amazon Marianna Siegmund-Schultze, 2002 A pecuária bovina uma atividade comum na Amazônia por muitas controvérsias sobre a sua rentabilidade e que seja apropriada para essa região Críticas negativas afirmam que o gado bovino exótico e que o pasto prejudica os serviços ambientais da mata amazônica Também a degradação rápida da pastagem restringe o desempenho da produção bovina Os defensores que representam principalmente as comunidades locais argumentam sobre a necessidade da pecuária bovina que considerada por eles como uma atividade adequada para esse meio ambiente Por muitos sistemas de produção animal apresentam grandes diferenças e poucas as fazendas de grande porte que dispõem de muitas cabeças de gado enquanto a maioria dos pecuaristas têm pequenas propriedades com pequeno número de animais Em geral os pequenos produtores também possuem cultivos agrícolas Apesar das diferenças nos tipos de sistemas a avaliação sobre produção bovina local realizada até esse momento não considerou suficientemente essas discrepâncias e utilizou técnicas de avaliação gerais que não incluem a produção física das propriedades Benefícios socioeconômicos tais como o acesso e gerenciamento do capital não foram considerados satisfatoriamente Assim foi levantada a hipótese de que se o gado não produtivo como o cultivo agrícola o gado utilizado como um recurso complementar ou representa capital Um estudo mensal foi realizado em 37 pequenas propriedades de três áreas da região Bragantina Os produtores foram visitados durante 15 meses utilizando um questionário semi estruturado Informantes sobre todas as entradas saídas e transações internas da propriedade foram levantadas com enfoque na produção bovina Questionários não repetidos sobre elementos menos dinâmicos complementaram o levantamento de dados Além disso estatísticas nacionais foram processadas para estabelecer tendências gerais
