Formal Techniques for Networked and Distributed Systems - FORTE 2007 John Derrick,Jüri Vain,2007-06-12 This book constitutes the refereed proceedings of the 27th IFIP WG 6.1 International Conference on Formal Techniques for Networked and Distributed Systems FORTE 2007 held in Tallinn Estonia in September 2007 co located with TestCom FATES 2007 It covers service oriented computing and architectures using formalized and verified approaches Fundamental Approaches to Software Engineering Maura Cerioli,2005-03-01 ETAPS 2005 was the eighth instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised several conferences CC ESOP FASE FOSSACS TACAS 17 satellite workshops AVIS BYTECODE CEES CLASE CMSB COCV FAC FESCA FINCO GCW DSE GLPL LDTA QAPL SC SLAP TGC UITP seven invited lectures not including those that were specific to the satellite events and several tutorials We received over 550 submissions to the several conferences this year giving acceptance rates below 30% for each one Congratulations to all the authors who made it to the final program I hope that most of the other authors still found a way of participating in this exciting event and I hope you will continue submitting The events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive

Tools and Algorithms for the Construction and Analysis of Systems Tiziana Margaria,Wang Yi,2003-06-29 This book constitutes the refereed proceedings of the 7th International Conference on Tools and Algorithms for the Construction and Analysis of Systems TACAS 2001 The 36 revised full papers presented together with an invited contribution were carefully reviewed and selected from a total of 125 submissions The papers are organized in sections on symbolic verification infinite state systems deduction and abstraction application of model checking techniques timed and probabilistic systems hardware design and verification software verification testing techniques and tools implementation techniques semantics and compositional verification logics and model checking and ETAPS tool demonstration

Programming Languages and Systems Pierpaolo Degano,2003-03-14 Comparison is a powerful cognitive research tool in science since it does across studies to evaluate similarities and differences e.g. across taxa or diseases This book deals with comparative research on plant disease epidemics Comparisons are done in specifically designed experiments or with posterior analyses From the apparently unlimited diversity of epidemics of hundreds of

diseases comparative epidemiology may eventually extract a number of basic types These findings are very important to crop protection Plant disease epidemiology being the ecological branch of plant pathology may also be of value to ecologists but also epidemiologists in the areas of animal or human diseases may find interesting results applicable to their areas of research

High Confidence Software Reuse in Large Systems Hong Mei,2008-07-29 Software reuse depicts a great vision for the software industry It has been widely viewed as a promising way to improve both the productivity and quality of software development However despite of the successes we have achieved there are still many issues that have limited the promotion of software reuse in the real world Therefore software reuse has remained an important hotspot of research ICSR is the premier international conference in the field of software reuse It has been an important venue for presenting advances and improvements within the software reuse domain and a powerful driving force in promoting the interaction between researchers and practitioners The theme of ICSR 10 was High Confidence Software Reuse in Large Systems A high confidence system is one that behaves in a well understood and predictable fashion Today s trends towards widespread use of commercial off the shelf COTS technology increased integration continuous evolution and larger scale are yielding more complex software systems So the problem of how to build high confidence complex systems and how to reuse software with a high level of confidence has become a new attractive topic for research Furthermore high level software asset reuse has been a goal for the last 20 30 years and it can still be considered an unsolved question Components based development MDA MDE MDD extreme programming and other techniques or methods are promising approaches to software reuse that still need more research These proceedings report on the current state of the art in software reuse
