Methods for the Analysis of Stone Artefacts Yvonne Tafelmaier, Guido Bataille, Viola Schmid, Andreas Taller, Manuel Will, 2023-01-13 This essential gives an overview of current methods of analysis of stone artefacts ranging from attribute analysis of entire inventories to microscopic analyses of traces of use of individual artefacts The presented approaches show the range of analysis of prehistoric stone artefacts in the German speaking area Simple examples of application illustrate the possibilities and limitations of each method The content and structure of the essentials is identical to teaching units for learning methods of stone artefact analysis at the University of T bingen in the Department of Early Prehistory

Transitions Before the Transition Erella Hovers, Steven Kuhn, 2007-01-06 Modern human origins and the fate of the Neanderthals are arguably the most compelling and contentious arenas in paleoanthropology The much discussed split between advocates of a single early emergence of anatomically modern humans in sub Saharan Africa and supporters of various regional continuity positions is only part of the picture Equally if not more important are questions surrounding the origins of modern behavior and the relationships between anatomical and behavioral changes that occurred during the past 200 000 years Although modern humans as a species may be defined in terms of their skeletal anatomy it is their behavior and the social and cognitive structures that support that behavior which most clearly distinguish Homo sapiens from earlier forms of humans This book assembles researchers working in Eurasia and Africa to discuss the archaeological record of the Middle Paleolithic and the Middle Stone Age This is a time period when Homo sapiens last shared the world with other species and during which patterns of behavior characteristic of modern humans developed and coalesced Contributions to this volume query and challenge some current notions about the tempo

and mode of cultural evolution and about the processes that underlie the emergence of modern behavior The papers focus on several fundamental questions Do typical elements of modern human behavior appear suddenly or are there earlier archaeological precursors of them Are the archaeological records of the Middle Paleolithic and Middle Stone Age unchanging and monotonous or are there detectable evolutionary trends within these periods Coming to diverse conclusions the papers in this volume open up new avenues to thinking about this crucial interval in human evolutionary history Learning Among Neanderthals and Palaeolithic Modern Humans Yoshihiro Nishiaki, Olaf Jöris, 2019-11-27 This book is based on the research performed for the Replacement of Neanderthals by Modern Humans Project The central issue of the project is the investigation of possible differences between the two populations in cognitive ability for learning The project aims to evaluate a unique working hypothesis coined as the learning hypothesis which postulates that differences in learning eventually resulted in the replacement of those populations The book deals with relevant archaeological records to understand the learning behaviours of Neanderthals and modern humans Learning behaviours are conditioned by numerous factors including not only cognitive ability but also cultural traditions social structure population size and life history The book addresses the issues in two parts comparing learning behaviours in terms of cognitive ability and social environments respectively Collectively it provides new insights into the behavioural characteristics of Neanderthals and modern humans from a previously overlooked perspective Furthermore it highlights the significance of understanding learning in prehistory the driving force for any development of culture and technology among human society Techno-logic & Technology Éric Boëda, 2023-05-31 Techno logic Technology is an ambitious effort to develop a new framework for studying the development of stone tool technology with the goal of integrating humanity's earliest and longest lasting technology into a comprehensive questioning of the interaction between humanity and the material world Michael Chazan provides a translation of Eric Boëda's authoritative work Techno logique and Technologie which draws on the latter's career of research on stone tool assemblages from archaeological sites in Europe the Middle East China and South America together with a theoretical apparatus influenced by the work of Gilbert Simondon This book presents a major challenge to all archaeologists studying ancient technology to reconsider how they think about artifacts and how to approach the question of progress through time in human technology Lithic analysis is a highly empirical field of study that rarely has an impact on issues of broad theoretical interest and Boëda's book is a welcome exception As well as providing contextualising information within the text the translator Michael Chazan himself a Paleolithic archaeologist specializing in stone tool technology includes an interview with the author to help equip the reader to engage with this challenging text Chiming with the growth of interest in the work of Gilbert Simondon in the English speaking world this book is an important resource for Palaeolithic archaeologists and lithic specialists It will also be of interest to researchers in material culture studies technology studies and human evolution

Modern Humans in Western Asia Takeru Akazawa, Kenichi Aoki, Ofer Bar-Yosef, 2005-12-27 In this fascinating volume the
 Middle Paleolithic archaeology of the Middle East is brought to the current debate on the origins of modern humans These
 collected papers gather the most up to date archaeological discoveries of Western Asia a region that is often overshadowed
 by African or European findings but the only region in the world where both Neandertal and early modern human fossils have
 been found The collection includes reports on such well known cave sites as Kebara Hayonim and Qafzeh among others The

More Than Meets the Eye A. Nigel Goring-Morris, Anna Belfer-Cohen, 2003 These twenty three papers focus on recent
 research into the Upper Palaeolithic of the Levant a murky period of human history ca 45 000 to 20 000 years ago during
 which modern patterns of human behaviour and communication became the norm The vast majority of archaeological data
 from this period relates to chipped stone tools and most contributors focus on defining and distinguishing the two main
 traditions in lithic technology the Levantine Aurignacian and the Ahmarian Some papers report on recent fieldwork others
 seek to define and explain reasons for variation and change in material culture Do lithic traditions represent different
 corporate groups of hunter gatherers or can variation be explained by other factors such as adaptations to local landscapes

and environments or changing patterns of mobility An appendix provides a comprehensive list of available Upper Palaeolithic 14C dates in the Near East Most of the papers derive from a conference session on the Levantine Upper Palaeolithic held as part of the Society for American Archaeology annual meeting in 2000 *New Approaches to the Study of Early Upper Paleolithic 'transitional' Industries in Western Eurasia* Julien Riel-Salvatore, Geoffrey A. The Middle-Upper Paleolithic Transition in Israel Josette Sarel, 2004 This work examines the problem of the Middle Upper Paleolithic transitional industry in Northern Israel It has generally been accepted that no such transition occurred here nevertheless many transitional sites yield rich deposits and recent discoveries of well stratified transitional industries in the Levant have led the author to reconsider this supposition If the enigmatic assemblages from Northern Israel share the same cultural background with the assemblages which have been derived from undisturbed layers the existence of the transitional industry in Northern Israel may be validated Through technological analysis the author undertakes the determination of the reduction strategies and the main tool types used in various assemblages and determines that two contemporaneous traditions occur in Israel the Middle Upper Paleolithic transition evolving into an early Upper Paleolithic in the North and a Southern transition defined by Monigal as an Initial Upper Paleolithic which evolves into the Ahmarian in the South leolithic which evolves into the Ahmarian in the South leolithic which evolves into the Ahmarian in the South leolithic which evolves into the Ahmarian in the South
