## **Conceptions Of Truth:**

**Conceptions of Truth** Wolfgang Künne, 2003-06-06 Truth is one of the most debated topics in philosophy Wolfgang Künne presents a comprehensive critical examination of all major theories Conceptions of Truth is organized around a flow chart comprising sixteen key questions ranging from Is truth a property to Is truth epistemically constrained Künne expounds and engages with the ideas of many thinkers from Aristotle and the Stoics to Continental analytic philosophers like Bolzano Brentano and Kotarbinski to such leading figures in current debates as Dummett Putnam Wright and Horwich He explains many important distinctions between varieties of correspondence for example between different conceptions of making true between various kinds of eternalism and temporalism which have so far been neglected in the literature Künne argues that it is possible to give a satisfactory modest account of truth without invoking problematic notions like correspondence fact or meaning And he offers a novel argument to support the realist claim that truth outruns justifiability The clarity of exposition and the wealth of examples will make Conceptions of Truth an invaluable and stimulating guide for advanced students and scholars in metaphysics epistemology and the philosophy of language

**Levinas and Analytic Philosophy** Michael Fagenblat, Melis Erdur, 2019-11-27 This volume examines the relevance of Emmanuel Levinas's work to recent developments in analytic philosophy Contemporary analytic philosophers working in metaethics the philosophy of mind and the metaphysics of personal identity have argued for views similar to those espoused by Levinas Often disparately pursued Levinas's account of ethics as first philosophy affords a way of connecting these respective enterprises and showing how moral normativity enters into the structure of rationality and personal identity In metaethics the volume shows how Levinas's moral phenomenology relates to recent work on the normativity of rationality and intentionality and how it can illuminate a wide range of moral concepts including accountability moral intuition respect conscience attention blame indignity shame hatred dependence gratitude and guilt The volume also tests Levinas's innovative claim that ethical relations provide a way of accounting for the irreducibility of personal identity to psychological identity The essays here contribute to ongoing discussions about the metaphysical significance and sustainability of a naturalistic but nonreductive account of personhood Finally the volume connects Levinas's second person standpoint with analogous developments in moral philosophy

**Shattering Silos** Lambert Zuidervaart, 2022-08-15 Questions first raised by Hannah Arendt in the 1960s take on new urgency in the post truth era as political leaders blithely reject facts in the public domain Is truth politically impotent Are politics inherently false Is the search for truth still relevant Shattering Silos a companion volume to Religion Truth and Social Transformation and Art Education and Cultural Renewal provides a path breaking response As in his two previous books Lambert Zuidervaart challenges the boundaries philosophers set up between epistemology ethics and political philosophy Knowledge he argues takes different forms in various social domains and all are subject to political struggle A critique of contemporary society must draw on many social domains of knowledge including the

arts and religion and should recast politics as a striving for truth in the broadest sense Proposing a new conception of truth one that emphasizes the unity of knowledge and truth as well as their diversity among different social domains Zuidervaart asks what such holism and pluralism suggest about how we understand politics and society This book proposes a new understanding of large scale social change challenging how most people think about knowledge and truth Interweaving epistemology social criticism and political thought Shattering Silos aims to help redirect an allegedly post truth society

The Democratic Horizon Alessandro Ferrara,2014-03-24 Alessandro Ferrara explains what he terms the democratic horizon the idea that democracy is no longer simply one form of government among others but is instead almost universally regarded as the only legitimate form of government the horizon to which most of us look Professor Ferrara reviews the challenges under which democracies must operate focusing on hyperpluralism and impresses a new twist onto the framework of political liberalism He shows that distinguishing real democracies from imitations can be difficult responding to this predicament by enriching readers understanding of the spirit of democracy clearing readers views of pluralism from residues of ethnocentrism and conceiving multiple versions of democratic culture rooted in the diversity of civilizational contexts
