

Deflationary Truth, Ordinary Truth and Relative Truth

Verdad deflacionista, verdad ordinaria y verdad relativa

RAMIRO CASO*

Abstract. Horwich (*Mind* 123(491), 2014) has argued that only someone with inflationary tendencies could feel inclined to endorse truth relativism. In doing so, he argues that deflationism about truth entails the denial of relativism. If sound, Horwich's argument could entail that truth relativism is incompatible with any conception of our ordinary truth predicate according to which there is some sort of equivalence between a ground-language claim that *p* and the corresponding claim that *p* is true. Arguably, any story the relativist might give about our ordinary truth predicate should entail some such equivalence. Hence, there is a problem for truth relativism that needs to be addressed.

Keywords: truth relativism; radical relativism; deflationism.

Resumen. Horwich (*Mind* 123(491), 2014) ha argumentado que solo alguien con tendencias inflacionistas podría sentirse inclinado a adoptar el relativismo de la verdad. Al hacer eso, argumenta que el deflacionismo acerca de la verdad implica la negación del relativismo de la verdad. Si el argumento de Horwich es sólido, podría de hecho implicar que el relativismo de la verdad es incompatible con cualquier concepción de nuestro predicado de verdad ordinario de acuerdo con la cual hay algún tipo de equivalencia entre una afirmación de que *p* del lenguaje de base y la afirmación de que *p* es verdadera. Cualquier historia que el relativista podría contar respecto de nuestro predicado de verdad ordinario debería implicar una equivalencia semejante. Por lo tanto, hay un problema para el relativismo de la verdad que requiere atención.

Palabras clave: relativismo de la verdad; relativismo radical; deflacionismo.

1. Introduction

In (2014), Horwich concludes that ‘only those philosophers with initial attachments to one or another *inflationary* conception of “absolute truth and falsity” will have reason to say that certain propositions “can be true only relative to a perspective”’ (Horwich (2014, 736)). In arguing for this conclusion, he makes two separate claims: that certain inflationary

Deflationary Truth:

Deflationary Truth Bradley P. Armour-Garb, J. C. Beall, 2005 Deflationism is a recent but increasingly popular theory of truth Deflationists deny the existence of a substantive theory about truth an account of the property truth that enables all of the facts about truth to be explained Deflationism rejects all of the existing traditional theories about truth correspondence coherence and pragmatist Students of philosophy as well as deflationary theorists will appreciate the depth of the articles as well as the exhaustive annotated bibliography in this book *Kripke's Wittgenstein* Ali Hossein Khani, 2026-05-05 This book offers a comprehensive examination of Kripke's influential reading of the later Wittgenstein presented in *Wittgenstein on Rules and Private Language* 1982 together with the principal objections raised by more than twenty philosophers It introduces the key ideas that frame Kripke's sceptical challenge then analyses the main components of the sceptical argument Kripke attributes to Wittgenstein and elucidates the sceptical solution he takes Wittgenstein to propose as an alternative to classical realism It also explores how both the sceptical problem and an additional special problem arise in the attributing sensations and in traditional approaches to the problem of other minds The concluding chapters survey the major responses to Kripke's interpretation developed by philosophers working on the topic since the 1980s including John McDowell Simon Blackburn Gordon Baker Peter Hacker Colin McGinn Crispin Wright Paul Boghossian Philip Pettit Barry Stroud Hannah Ginsborg Alexander Miller George Wilson Scott Soames Noam Chomsky Paul Horwich as well as Norman Malcolm Donald Davidson David Lewis Christopher Peacocke Jerry Fodor David Stern Alex Byrne Ruth Millikan Hilary Putnam and John Searle *Mathematical Anti-Realism and Modal Nothingism* Mark Balaguer, 2023-01-05 This Element defends mathematical anti realism against an underappreciated problem with that view a problem having to do with modal truthmaking Part I develops mathematical anti realism it defends that view against a number of well known objections and it raises a less widely discussed objection to anti realism an objection based on the fact that a mathematical anti realists need to commit to the truth of certain kinds of modal claims and b it's not clear that the truth of these modal claims is compatible with mathematical anti realism Part II considers various strategies that anti realists might pursue in trying to solve this modal truth problem with their view it argues that there's only one viable view that anti realists can endorse in order to solve the modal truth problem and it argues that the view in question which is here called modal nothingism is true *The Blackwell Companion to Naturalism* Kelly James Clark, 2016-02-15 The Blackwell Companion to Naturalism provides a systematic introduction to philosophical naturalism and its relation to other schools of thought Features contributions from an international array of established and emerging scholars from across the humanities Explores the historical development of naturalism and its ascension to the dominant orthodoxy in the Western academy Juxtaposes theoretical criticisms with impassioned defenses encapsulating contemporary debates on naturalism Includes discussions of metaphysics realism feminism science knowledge truth mathematics free will and ethics viewed through a naturalist lens **Do Numbers Exist?**

Global Anti-realism James O. Young, 1995 This text seeks to provide an answer to the perennial question what is truth According to the global anti-realist the truth conditions of all classes of sentences are detectable by speakers The author argues that the only way to be a global anti-realist is to maintain that the truth conditions of all sentences are the conditions under which they cohere with a system of beliefs Global anti-realism is a form of coherence theory of truth Realists are committed to some form of correspondence theory Both camps are opposed to deflationary accounts of truth according to which truth is not a property of sentences
