Democracy, Market Economics, and Development Farrukh Iqbal, Jong-Il You, 2001-01-01 Democracy Market Economics and Development evaluates the extent to which democracy is necessary to the achievement of sustainable development in Asia A selection of papers by distinguished contributors including Amartya Sen Joseph Stiglitz and Francis Fukuyama are included in this volume This book argues that democracy and markets are complementary and that democracy is intrinsic to development It contends that liberal and participatory democracy encourages development by providing legitimacy to reform efforts Movement toward liberal and participatory democracy allows for the convergence of the political and economic institutions of Asia and the West There is broad agreement that effective and sustainable development is multi faceted and is not only based on changes in per capita income

**Law and Society in East Asia** Christoph Antons, 2017-07-05 The massive and complex process of change in East Asia over recent decades has brought about a transformation in the nature of law and legal institutions in the region Whilst the process of change has to some degree mimicked western models of law and legal change there have been significant differences in approach due to the different social foundations of East Asian societies The more obvious of these has been the variety of ways in which rule of law ideas have been adopted in many East Asian countries where the role of the state is more dominant when compared with Western models This volume brings together a selection of the most important writings on East Asia of researchers in recent years and shows the broad range of questions which researchers have been addressing about the effect of law reform and legal change in societies dominated by traditional values and political forces and at a time of massive economic change

Constitutional Statecraft in Asian Courts Yvonne Tew, 2021-07-23 Constitutional Statecraft in Asian Courts explores how courts engage in constitutional state building in aspiring yet deeply fragile democracies in Asia Yvonne Tew offers an in depth look at contemporary Malaysia and Singapore explaining how courts protect and construct constitutionalism even as they confront dominant political parties and negotiate democratic transitions This richly illustrative account offers at once an engaging analysis of Southeast Asia s constitutional context as well as a broader narrative that should resonate in many countries across Asia that are also grappling with similar challenges of colonial legacies histories of authoritarian rule and societies polarized by race religion

and identity The book explores the judicial strategies used for statecraft in Asian courts including an analysis of the specific mechanisms that courts can use to entrench constitutional basic structures and to protect rights in a manner that is purposive and proportionate Tew s account shows how courts in Asia s emerging democracies can chart a path forward to help safeguard a nation s constitutional core and to build an enduring constitutional framework

**Governing Financial Globalization** Andrew Baker,David Hudson,Richard Woodward,2005-02-01 Money finance and credit are literally the lifeblood of the modern economy The distribution of money and credit are essential to productive investment in trade and industry to the maintenance of consumer purchasing power and demand to individuals social status and standard of living and ultimately to public order This important new volume provides a wide ranging discussion of both the potential and the problems arising from the application of multi level governance literature to the monetary and financial domain The contributors achieve this through a range of case studies and conceptual discussions of the issues raised by financial and monetary governance acknowledging that multi level governance has to take the form of a framework which recognizes a fluid range of scales and the significance of non formal institutional and social nodes of authority

*Studying Non-traditional Security in Asia* Ralf Emmers,Mely Caballero Anthony,Amitav Acharya,2006 The security challenges confronting Asia today go beyond the traditional dimensions of security and tend to be more diverse than what the region has ever known before Issues like infectious diseases trafficking in illegal drugs irregular migration environmental degradation financial crises and natural disasters are increasingly being treated as pressing concerns with

serious security implications Such concerns pose threats to the national sovereignty and territorial integrity of nation states as well as to the welfare and security of their respective societies and individuals Consisting of a collection of essays this volume presents current trends and research directions in non traditional security in Asia It is structured around research projects undertaken by various research institutes in the region showcasing their major findings and highlighting key implications for the field of non traditional security studies Hazard Or Right? Irene Hadiprayitno,2009 Contrary to the generally positive connotation of development as structural improvement in people s well being development policies programmes and projects often affect people s lives in a negative way Is there then a protection against such development hazards The question is highly topical as about ten million people annually enter the cycle of forced displacement and relocation due to development projects Their lack of access to decision making on development policies is part of the problem In this context the internationally declared right to development might offer a solution as it stipulates free and meaningful participation The analyses in this thesis show that the official and international consensus on the moral ideas behind the right to development is insufficient to guarantee proliferation and implementation of that discourse at the grass root level In Indonesia efforts towards implementation reflect different dynamics entailing competing encounters between all stakeholders which sometimes are unfavourable to the poor Notably the enforcement of the right to development as both a legal resource and a political instrument to change development practices needs to be firmly rooted in an enabling rather than adverse national environment While opening a new dialogue on the right to development as an instrument to combat development hazards this book reveals the complex interface between human rights and development as actually practised

**The Politics of the New International Financial Architecture** Susanne Soederberg,2004-11 Recent years have witnessed a veritable epidemic of financial crises from Mexico through South East Asia Russia Brazil and now Argentina The rich industrial countries led by the United States have had to respond This book examines the G7 s attempts over the past decade to re establish rules and a degree of order in the world financial system through the creation of the Financial Stability Forum and the G20 which they are calling the New International Financial Architecture Susanne Soederberg asks Why has the New International Financial Architecture emerged At whose initiative What does it involve What are the underlying power relations Who is benefiting Will it really work The author argues however that this tinkering with the capitalist system will not achieve either sustained economic growth or stability in financial markets let alone enhance the capability of developing countries to tackle the problems of mass poverty and social injustice **Transition Newsletter** ,2001 **East Asian Economies** V.
