

An aerial, high-angle photograph of a large brick building. The building's facade is composed of numerous rectangular windows arranged in a precise grid pattern. The perspective is from directly above, looking down at the structure. The brickwork is a mix of reddish-brown and tan tones, and the shadows cast by the window frames create a strong geometric pattern across the entire image.

Van Belle,2000-04-30 Van Belle provides the first systematic analysis of the effects that press freedom has on the conduct of international politics The institutionalization of press freedoms within a state and the free flow of information between the free presses of different nations creates a foreign policy decision making environment that systematically limits policy options generates domestic political imperatives and provides specific benefits to a leader This shapes some aspects of foreign policy in a consistent and empirically identifiable manner most notably by limiting international conflicts When social psychological propositions regarding dehumanization and the acceptance of killing in war are introduced to Van Belle s model shared press freedom is shown to provide a mechanism that prevents lethal conflicts The effects of press freedom on international conflict particularly on hypotheses related to escalating conflicts beyond the threshold of casualties are quite robust However Van Belle indicates there is no evidence of a complimentary effect on cooperation The combination of findings from the empirical analyses suggest that the key to the effects of press freedom center on the creation of images such as the dehumanized image of an enemy A thoughtful analysis that scholars and researchers of foreign policy and international relations as well as journalism and mass communication will find particularly useful [Comparing autocracies in the early Twenty-first Century](#) Aurel Croissant,Steffen Kailitz,Patrick Koellner,Stefan Wurster,2016-03-17 Authoritarianism research has evolved into one of the fastest growing research fields in

comparative politics The newly awakened interest in autocratic regimes goes hand in hand with a lack of systematic research on the results of the political and substantive policy performance of variants of autocratic regimes The contributions in this second volume of *Comparing Autocracies* are united by the assumption that the performance of political regimes and their persistence are related Furthermore autocratic institutions and the specific configurations of elite actors within authoritarian regime coalitions induce dictators to undertake certain policies and that different authoritarian institutions are therefore an important piece of the puzzle of government performance in dictatorships Based on these two prepositions the contributions explore the differences between autocracies and democracies as well as between different forms of non democratic regimes in regard to their outcome performance in selected policy fields how political institutions affect autocratic performance and persistence whether policy performance matter for the persistence of authoritarian rule and what happens to dictators once autocratic regimes fall This book is an amalgam of articles from the journals *Democratization* *Contemporary Politics* and *Politische Vierteljahresschrift*

Coalitional Presidentialism in Comparative Perspective Paul Chaisty, Nic Cheeseman, Timothy J. Power, 2018 This book provides the first cross regional study of an increasingly important form of politics coalitional presidentialism Drawing on original research of minority presidents in the democratising and hybrid regimes of Armenia Benin Brazil Chile Ecuador Kenya Malawi Russia and Ukraine it seeks to understand how presidents who lack single party legislative majorities build and manage cross party support in legislative assemblies It develops a framework for analysing this phenomenon and blends data from MP surveys detailed case studies and wider legislative and political contexts to analyse systematically the tools that presidents deploy to manage their coalitions The authors focus on five key legislative cabinet partisan budget and informal exchange of favours tools that are utilised by minority presidents They contend that these constitute the toolbox for coalition management and argue that minority presidents will act with imperfect or incomplete information to deploy tools that provide the highest return of political support with the lowest expenditure of political capital In developing this analysis the book assembles a set of concepts definitions indicators analytical frameworks and propositions that establish the main parameters of coalitional presidentialism In this way *Coalitional Presidentialism in Comparative Perspective* provides crucial insights into this mode of governance *Oxford Studies in Democratization* is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford

The Origin of Electoral Systems in the Postwar Era Krister Lundell, 2009-09-10 This book explores and presents the influence of contextual factors on the choice of electoral systems for parliamentary elections in both democracies and non democracies around the world Taking a macroscopic approach the author focuses on

structural explanations with an emphasis on general patterns rather than country specific explanations Drawn from a wealth of data the book presents the frequency of the adoption of each electoral formula and system in the postwar era and is followed by a theoretical elaboration of electoral system choice The author then draws on rational cultural historical and institutional theories which are systematically analyzed by means of sophisticated bivariate and multivariate techniques Lundell demonstrates that few electoral systems have been chosen from rational considerations and the impact of the cultural and historical setting is tremendous colonial legacy regional influence and temporal trends largely explain the cross national variation in electoral systems This book will be of interest to students and scholars of political science electoral politics and comparative politics
