Population Under Duress George J Demko, 2018-03-05 The demographic history of twentieth century Russia has been marked by a series of tragedies Calamitous wars revolutions civil strife and political murders have resulted in unparalleled mortality rates depressed fertility rates and sadly unprecedented demographic patterns of all types This volume explores the most recent problems afflicting the Russian population in the post Cold War era The demise of the Soviet Union has brought new hardships the collapse of the health care system internal strife and economic disruptions to the people and has deeply affected demographic processes throughout Russia The contributors explore key trends from increasing mortality rates and decreasing birth rates to refugee flows into Russia and the brain drain out of Russia Problems of aging increased infant mortality and urban and rural population change are discussed in detail for each major region Rarely has there been a better opportunity to examine the spatial economic psychological and political factors contributing to demographic stress in a current setting These demographic processes are not only unique as a domestic social phenomenon but are also immensely significant in their global impact influencing international migration and foreign aid *Premature Death in the New Independent States* National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1997-06-27 In recent years there have been alarming reports of rapid decreases in life expectancy in the New Independent States former members of the Soviet Union To

help assess priorities for health policy the Committee on Population organized two workshops the first on adult mortality and disability the second on adult health priorities and policies Participants included demographers epidemiologists public health specialists economists and policymakers from the NIS countries the United States and Western Europe This volume consists of selected papers presented at the workshops They assess the reliability of data on mortality morbidity and disability analyze regional patterns and trends in mortality rates and causes of death review evidence about major determinants of adult mortality and discuss implications for health policy

Regional Population Trends in the Former USSR, 1939-51, and the Impact of World War II Richard H. Rowland,1997 **Population Bulletin of the United Nations** United Nations. Department of Economic and Social Affairs,1999 **World Population Prospects as Assessed in ...** ,1994 **The Central and East European Population Since 1850** Franz Rothenbacher,2012-10-31 The Central and East European Population since 1850 is the third volume in the European Population series providing the most comprehensive statistical data available on Central and East European demography It is a comparative and historical data handbook presenting series data on demographic developments population and household structures for the countries of Central and East Europe All major fields of demographic change are covered fertility mortality marriage and divorce Population figures are given for each population census by sex civil status and age Major demographic developments with the family are described providing commentary on the main population structures and trends in Europe since the 19th century *Lithuanian Jewry, 1993* Sidney Goldstein,Alice Goldstein,1997 **Humanities and Social Sciences** ,2007 *Czech Sociological Review* ,1996 Russia's Demographic "crisis" Julie DaVanzo,Gwendolyn Farnsworth,1996 During the last several years the Russian public and Russian policymakers have been becoming increasingly concerned about demographic trends in their country The six papers in this volume reflect the current state of knowledge in two broad categories 1 fertility and family planning and 2 issues in the area of health and morality health status health care and population growth *How Much Does Social Capital Add to Individual Health?* Richard Rose,2000 **Gender and Social Security in Central and Eastern Europe and the Countries of the Former Soviet Union** Brigitte M. Holzner,1997 Groups references by country and by region **Between Zeus and the Salmon** Caleb E. Finch,Committee on Population,1997-10-29 Demographers and public health specialists have been surprised by the rapid increases in life expectancy especially at the oldest ages that have occurred since the early 1960s Some scientists are calling into question the idea of a fixed upper limit for the human life span There is new evidence about the genetic bases for both humans and other species There are also new theories and models of the role of mutations accumulating over the life span and the possible evolutionary advantages of survival after the reproductive years This volume deals with such diverse topics as the role of the elderly in other species and among human societies past and present the contribution of evolutionary theory to our understanding of human longevity and intergenerational transfers mathematical models for survival and the potential for collecting genetic material in household surveys It will be particularly valuable for
