Democracy Trap:

The Democracy Trap Graham E. Fuller, 1991 Soon after the toppling of the Berlin Wall a scholar named Francis Fukuyama wrote a piece in The New York Times stating that the momentous events occurring in Eastern Europe signalled the end of history as a result of the final failure of the communist experiment Here is a powerful rebuttal that warns global democracy will cause not less but more conflict

Reconsidering the Limits to Growth Viktor Sadovnichy, Askar Akaev, Ilya Ilyin, Sergey Malkov, Leonid Grinin, Andrey Korotayev, 2023-09-25 Echoing the famous The Limits to Growth report from 1972 this edited volume analyses the changes that the World System has undergone to the present on the fiftieth anniversary of the original report During the past fifty years both the concept and understanding of these limits have significantly changed This book highlights that the evolution of the World System has approached a new critical milestone moving into a fundamentally new phase of historical development when the old economic and social technologies no longer work as efficiently as before or even begin to function counterproductively which leads the World System into a systemic crisis The book discusses the transition of human society to a new phase state the shape of which has not yet been determined New approaches are needed for both for the analysis of the global situation and for forecasts The book is based on an integrated approach including the world systems historical and evolutionary perspectives as well as a systematic view of society in which changes in one subsystem cause transformations in others Through mathematical modeling it defines the main vectors of transformations of the World System makes a detailed forecast of the development of all the main subsystems of the society and the World System while presenting horizons of changes from short term to ultra long term and presents different development scenarios as well as recommendations on how to achieve a transition to the most favorable scenario The book will appeal to members and followers of the Club of Rome policy makers as well as to scholars from various disciplines interested in a better understanding of the World System evolution global futures development studies climate change and future societies

Why Politics Fails Ben Ansell, 2023-05-23 A leading political expert explains why systems fail to deliver things we all want democracy equality solidarity security and prosperity and what can be done to create a just equitable and environmentally sane society The dawn of the twenty first century had the promise of a golden age The economy was stable and growing social peace seemed possible and technology appeared benign The past years have awakened us from this complacency We have long known what needs to be done to save the world from climate disaster Why do we continue on the path of self destruction The immense wealth of the United States should make poverty a historical curiosity Why is income inequality growing and the scourge of poverty increasing The vast majority of people around the world want to live in a society with democratic values Why is democracy receding Why is it so hard to get and keep the world we want Ben Ansell one of the world s leading experts on the dilemmas facing modern democracies vividly illustrates how our collective goals democracy equality solidarity security and prosperity are undermined by political traps and why today s

political landscape is so tumultuous We want equality but we are loathe to give away our own wealth We want solidarity but we are much better at receiving it than offering it We want security but not if it constrains our freedom And we want to end the climate crisis but we also want a prosperous economy In every case we want a collective goal but are undermined by our individual actions Our aims are altruistic our actions governed by self interest Ansell then comes full circle and through brilliant storytelling and pathbreaking research vividly illustrates how we maneuver through the traps of the messy complicated world of politics that block common sense solutions to the just equitable prosperous and environmentally sane society we all want
